

Progressive Web App

COBI.time can now be installed and used just like an app.

This offers the convenience of a native application without the need for a web UI.

What is a PWA?

A Progressive Web App (PWA) is a web application that starts via its own app icon and runs in its own window (without a browser bar).

The Benefits:

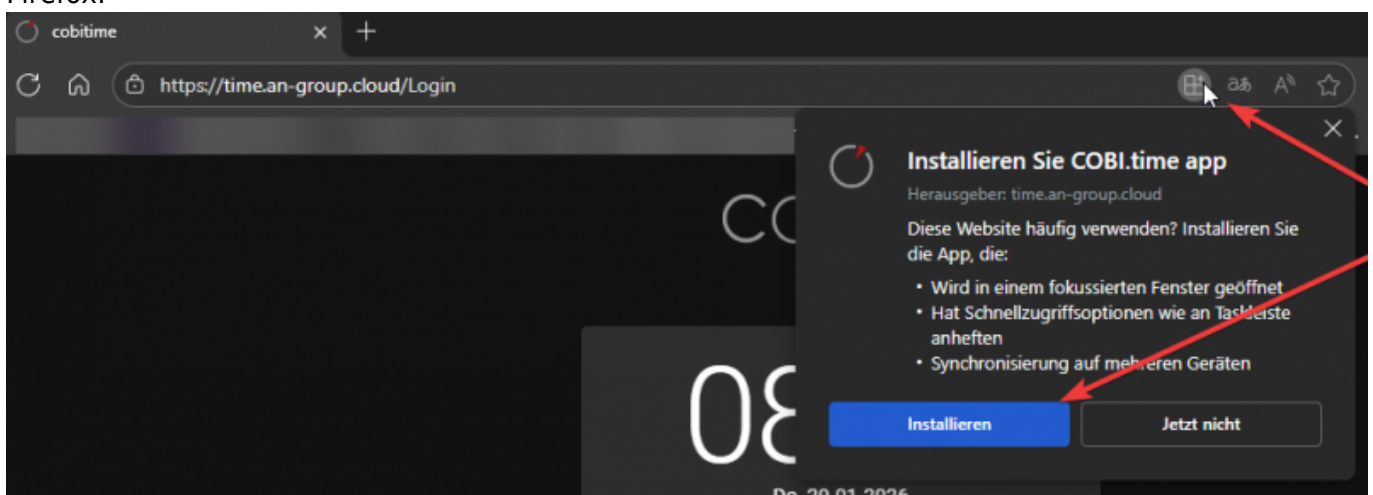

- **Quick access** directly via the Desktop or Start Menu
- **App-like usage** (focused window)
- **Ideal for terminals** and shared devices
- **Automatic updates** - the app always stays up to date

Installation (Windows)

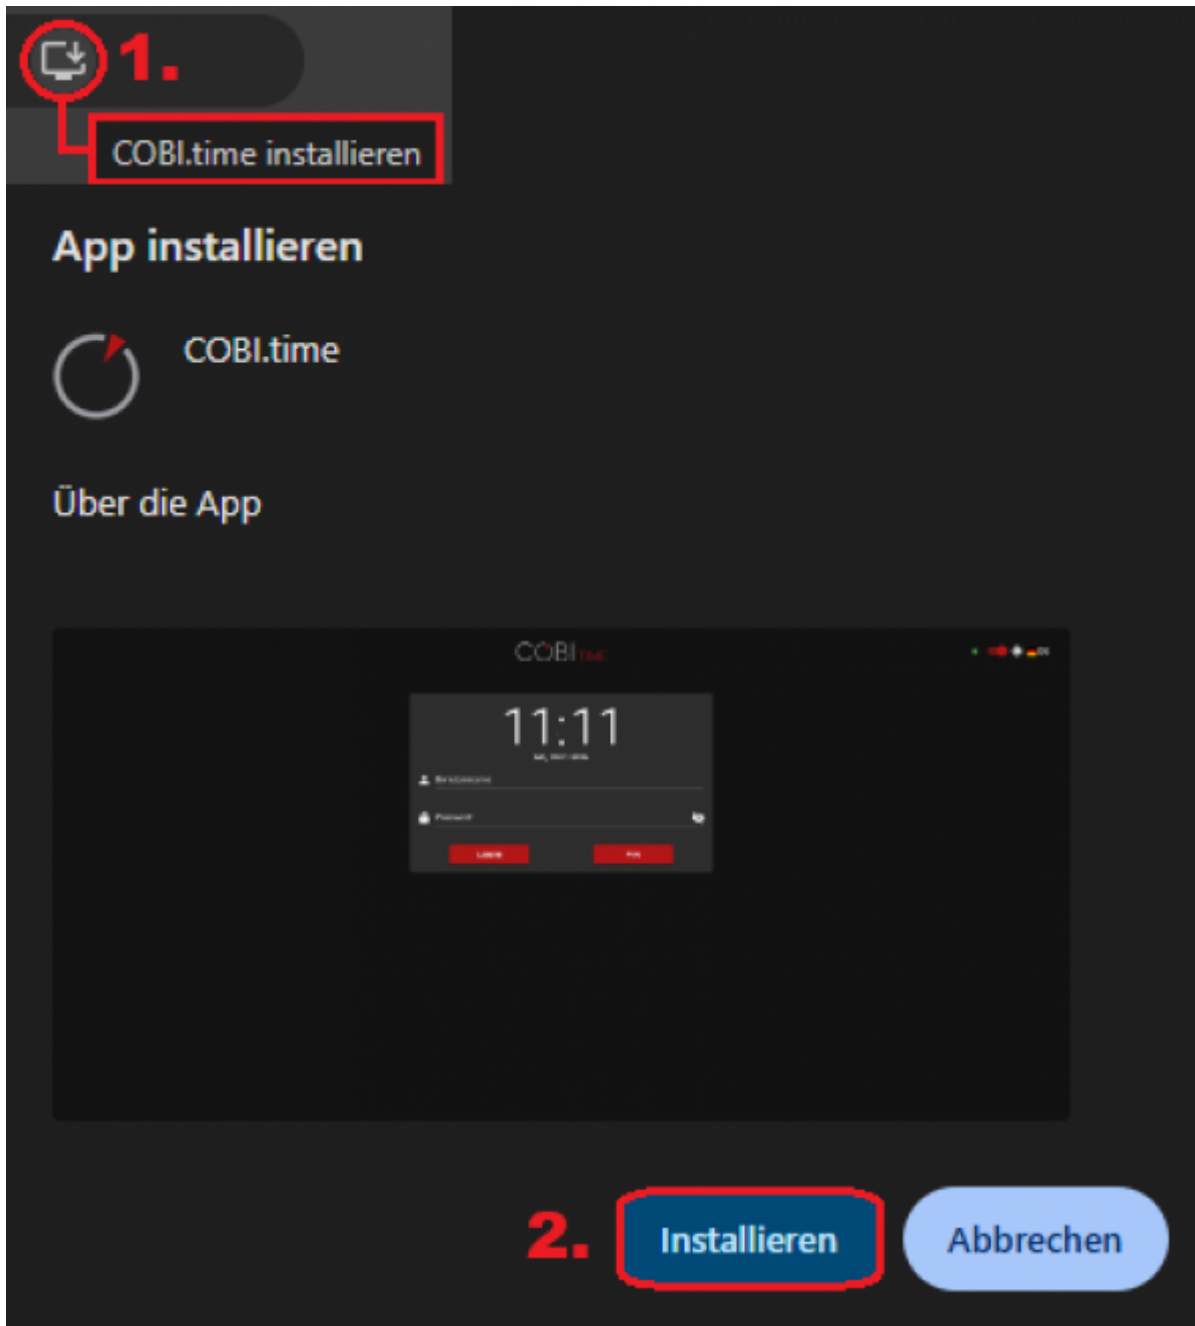

Installation is recommended using Google Chrome or Microsoft Edge. Note: Firefox Desktop does not support app installation.

1. Open COBI.time in your browser: <https://time.....cloud/>
2. Click on the **“Install”** icon on the right side of the address bar (often a monitor symbol with an arrow).
3. Confirm the installation in the dialog window.

Firefox:

Google Chrome:

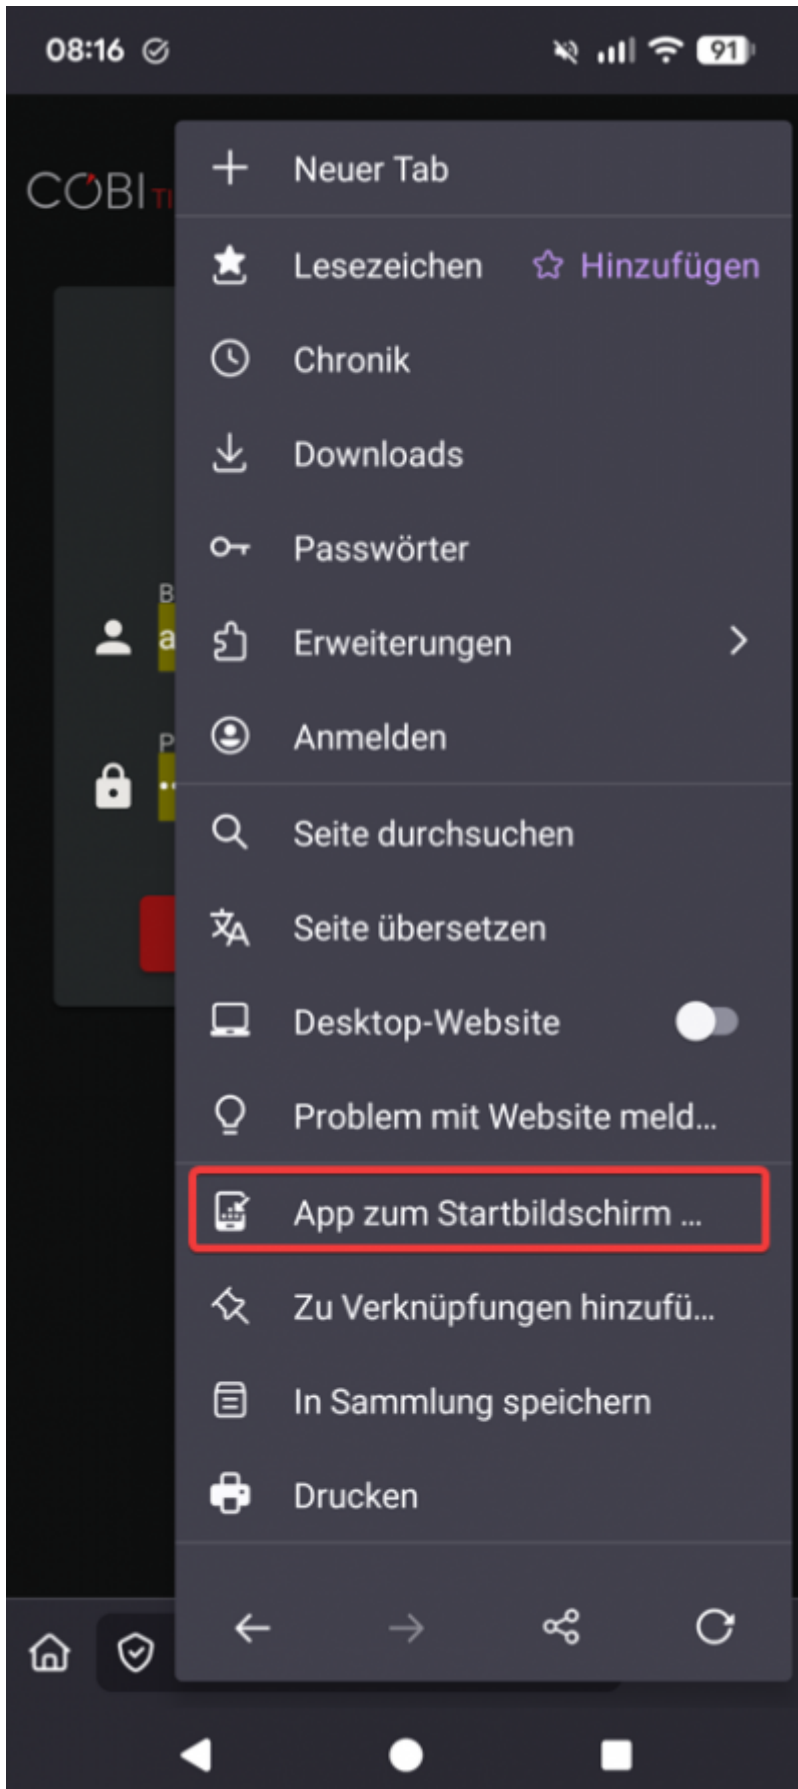

After installation, you can find COBI.time in your Start Menu or on your Desktop and start it like a normal program.

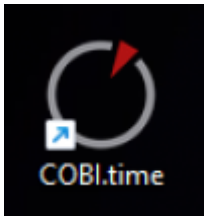

Installation (Android)

COBI.time can also be added as an app on Android (supported by Chrome and Firefox Android).

1. Open COBI.time in the browser on your smartphone.
2. Tap on the browser menu (the three dots or lines).
3. Select the option "Install app" or "Add to Home screen".

The COBI.time icon will now appear on your home screen.
