

Working with COBI.time

What is COBI.time?

COBI.time is an efficient personnel time recording in SAP Business One. It is a time recording system for modern medium-sized companies.

Whether on the move, in the office, on the construction site or when visiting a customer: COBI.time is your lean and modern solution for SAP Business One, which meets all the requirements of Modern working time recording everywhere and anytime.

- Commissioning with a few hours
- Device-independent use e.g. any web browser and Mobile devices
- Multilingual user interface and can be used internationally
- Exclusively for SAP Business One

Purpose and Scope

This document is the User Manual of COBI.time. It is intended to provide all the necessary information to use this software in the process of time recording management. It assists the customer in the use of COBI.time applicable to keep their work time and able to integrate with SAP Business One.

The manual assumes that the readers are familiar with the PC or the Device that COBI.time is installed in. The person who performs COBI.time must have sufficient security clearance and be authorized in accordance with the company's level of status.

Those individuals with access to the use of COBI.time in connection with classified hardware is required to familiarize themselves with and follow the instructions in this manual.

The manual is developed for medium-sized companies and is exclusive for SAP Business One. It contains five major sections including the Introduction:

- **Introduction:** describing the product and its importance, the purpose and scope of this user manual, and the general settings.
- **Employee Time Records:** Describing the process of timekeeping.
- **Administrative Functionality:** Describing the process of manual time records, users set up procedures, attendance control report, and Password setting.
- **Reporting Procedures:** Describing the availability of reports and exporting to Excel file.
- **Summary:** the concluding remarks of the user guide

General Settings

Open device configuration

Configure the device either to a Device or Terminal mode. This is how the first log-in window of COBI.time appears. Thus with your choice of preference, you can configure the device and save it for the future. To do this:

Step 1: Main Menu → Open Device Configuration

Step 2: Click Computer Icon to choose from the drop-down lists of the configuration mode.

Step 3: Click on Save

Language Setting

Once you Log-in to COBI.time, the Main Menu Window gets open. At the top right corner of this open Window, you choose your preferential language to work with. For example **German** or **English**.

Employee Time Records (Working with employee time keeping process)

For security and control purposes, an administrator or an authorized individual can have the right to start on COBI.time or automatic start option can be available. Then the system will be ready for use.

Start

Assume all the processes of installation and Integration with SAP Business One are completed. As an administrator or authorized employee you can start COBI.time either from the web browser or double click on the icon from the desktop. Then you will get the following window displayed:

User Account log-in

After starting COBI.time, Log-in window displays. Then do this:

- Step 1 Give **user name** and **password**
- Step 2 Click **LOGIN**

Or:

- Step 1 Simply click the **PIN** Button
- Step 2 Give **PIN** Code

COBI.time Main Menu

Menu List

You can display the list of the main menu on the left side of the COBI.time window. You **click** on the **Top Left Corner** of the opened window and see the Menu list:

Change Profile Picture

To change the profile picture, click on the picture box.

If you want to insert another picture, click on the Picture Box and select the required photo from the source and open. Then you get the new picture in its place.

Attendance Status

On the bottom of the Profile picture, it shows the Status: **In House**. This indicates the status of the attendance (**In House, Out of House or In Home Office**) during the regular working hours. The status can be depending on the activity or task an employee is engaged in. The activity can be a project (out of office), working from home (in Home Office), present in the office or absent.

Mail Notification

Mail Notification alerts you by displaying an icon in the notification area. Notification behaves exactly as one would expect, it sends a notification message to your inboxes. You want to open the Notification board. You should do this:

Click on the Notification board toolbar  on the Right Bottom Corner of the profile picture box. The number **1** indicates the number of messages available in the inbox.

To mark the message status as **Read** or **Unread**, **Select** the respective Message, then **click** on **Mailbox** 

To delete the message, click on **delete** 

To choose the display of as many as the number of rows per page, click on the **Down Arrow**

Rows per page: 10 
 _____ at the bottom of the window.

Note:

If the message box is empty, you cannot take any action. But if you have some available messages under **Notification Window**, you can select or deselect using the **checkbox** right to the message contents.

How Timekeeping works

Timekeeping is a great advantage to your administrative processes. It supports your organization or company in keeping track of the working hours performed by your employees.

As an employee, you **check-in** and **check-out** into COBI.time; thereby, your time for the job performed is recorded. To do this you must:

Log-in into COBI.time → Main Menu → Timekeeping

or

Simply **click** on the **Timekeeping icon** from the toolbar:

Timekeeping for work Category:

COBI.time enables employees to record working times and assign these to a project or as regular work time. The first step you do is to log-in using either your **PIN Code** or **User name** with a **Password**.

a) Record regular Work Time

Step 1: From the Main Menu Window, Click on **Timekeeping**

Main Menu → Timekeeping

Step 2: Click on **Come** to begin the time record

Main Menu → Timekeeping → Come

Note: In case there exist a Break Time, you stop the time. To do this:

Click on **Pause Start**

When the Break time is finished, click on **Pause End**

Step 3: Work time ends, Click on **Go**

Main Menu → Timekeeping → Go

Step 4: Return back to **Main Menu Window**, Click on **Back arrow**.

Step 5: Leave the Main Menu Window, Click on Back arrow again.

Note: The total time spent in performing the day's job is automatically saved in SAP Business One and included in the month's report.

b) Record Project Time

Project time is the time that an employee performs for a particular project. In this case, COBI.time has an option to record the time spent on a certain project. To do this: To start the project work time, click on **Project Start**

Main Menu → Timekeeping → Project Start 

In this case, there are options to choose from the project type such as Projects, Service calls and Finance Projects.

In the projects section, we can see if there exists an ongoing project to select from and then continue as going down to the stage level until we get the required project stage.

Choose a project stage. For example, Hardware Implementation.

Choose an activity within the project stage. For instance, recording of open issues and current situation.

Click on save.

The second option is to choose Service calls if available. In our example, there are no existing service

calls.

The third option is the availability of Finance projects from which we have to choose in order to carry out the process.

Choose Financial Project

Projects Servicecalls Finance Projects

- Aktion
- Hardware-Einführung
- IT-Projekt mit Subprojekten
- IT-Projekt Intern
- Messe

CANCEL OK

Click **ok** to proceed. Then it displays

SPEICHERN

Click on Save

To end the project work time, click on **Project End**

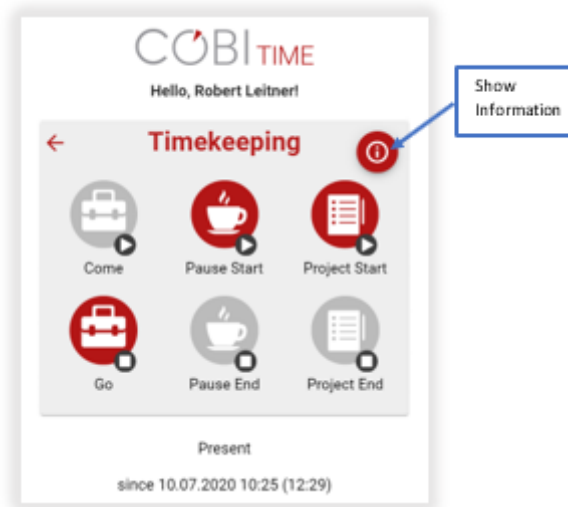

Main Menu → Timekeeping → Project End

View Recorded Data / User Information

The total time an individual spent in performing a certain job is available for you to check. For a particular month or working day, the history view is available. It is also possible to edit the already recorded data. These are available using the show information option. To do this:

Main Menu → Timekeeping → Show Information

From the Top Right Corner of the Timekeeping window, click on **Show Information** button 

Or

Main menu → User Info

Then the display looks like:

Robert Leitner

Present

Today's working hours:
00:58 Hours worked
00:00 Hours Pause
01:00 Hours Pausetime left

Balance: -208:59 Hours

Totalvacation: 15,00 Days

open	:	15,00	planned	:	00,00
taken	:	00,00	unconfirmed	:	01,00

As shown in the figure above, the displayed options are attendance notification (the message status either **present** or **absent** for the current user), the day's working hours, the balance or time report,

total vacation status and absence request  options.

Robert Leitner

Present

Today's working hours:
00:32 Hours worked
00:00 Hours Pause
01:00 Hours Pausetime left

Balance: -71:28 Hours

Totalvacation: 15,00 Days

open	:	15,00	planned	:	00,00
taken	:	00,00	unconfirmed	:	01,00

Another information available for you is the total vacation in days, vacation days remained open, planned, taken, and unconfirmed (requested but not yet approved).

Message Status inbox (Notification on the attendance status)

In this case, once we click on the Message status notification inbox  , it displays the messages available for this particular user or employee. The green box indicates the availability of the stored messages and the number, for example 1 in our case, shows one message is available.

Daily History View:

As an individual, you performed a certain job and recorded your work time daily in COBI.time. At the end of the day or being at the current date, you want to view the status. To do this, go to the Main menu as:

Main Menu → Timekeeping → Show information → Today's Working Hours

During the current date, we can see the status of Start and End time, total worked time, difference between daily work time and actual time worked, total break time, and time account balance at a glance.

History

Robert Leitner

Date: 28.07.2021
Wednesday

Status	Timestamp	Duration
Work started	28.07.2021 08:50	
Work finished	28.07.2021 14:50	06:00

Worktime is 06:00 **Pausetime is 00:00**

- 02:00

Timeaccount balance -144:55

You can also show and hide the deleted bookings by clicking at the top right corner button in the

history window

Edit History

Step 1: You can also edit history by clicking at the plus button as you can see in the picture to the left.

First, move to the required date on correction using Right and Left arrows. You can also click on the date-line that opens the calendar option to select the required date. Then go to editing.

Step 2: Go to the Status section and select the required option from the drop-down list.

Edit history

Status	Timestamp	Time
Work started	28.07.2021	08:50
Work finished	28.07.2021	17:50
+		00:00

Comment
Work Finished Time was wrongly posted

0 / 400

SAVE

Step 3: Include the required information, for instance, change the work finished time from 14:50 to 17:50. Then click the Save button. Confirm if the changes are correct to be saved. Click on Ok, if you want to save the changes. If no action is required, click outside the edit window to cancel the action.

Note: Include comments since they are mandatory in this case.

Furthermore, please consider the sequence while entering the timely data. They must be in the correct order, otherwise, the line will be marked in red and no further action can be taken. For example, if you try to include work that started at **10:55** and ends at **09:54**. It will be marked in red. See below:

Edit history

Status	Timestamp	Time
Work started	28.07.2021	10:55
Work finished	28.07.2021	09:54
+		00:00

Comment
Work finished time was wrongly put

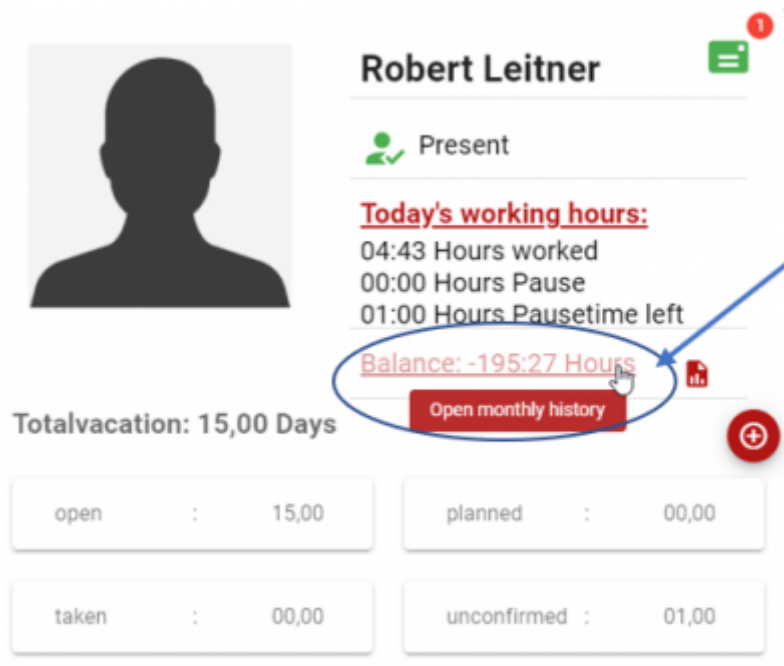

34 / 400

SAVE

If deemed necessary, use the Trash can  on the right side of each record in order to delete the wrongly put data. Then confirm the deletion.

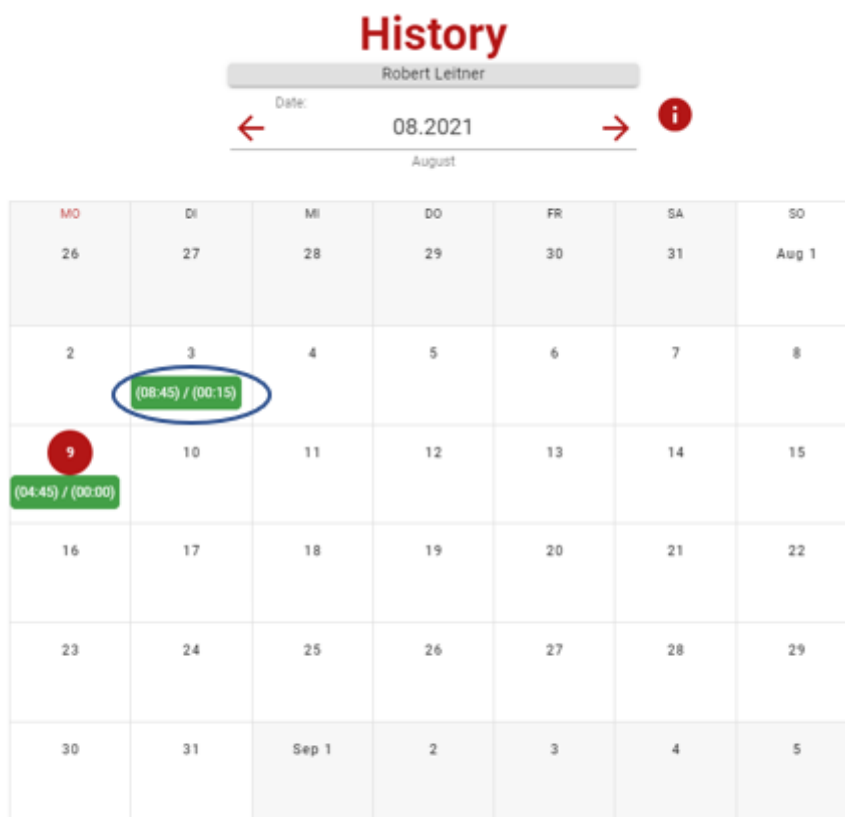

Monthly History View

The total hours spent during the month can also be viewed in COBI.time at a glance. Based on the show information window, you can click on the open monthly history button as shown below.

Then the window below opens, and you can view the selected months' time account balance and status of each day-time record in the month.

Edit history: it is available from this section. Click on the respective date that requires editing. For example, select the date July 07, 2021, from the table on the left. Then the records will be ready for editing. (Follow the steps similar to the Edit history section)

Timeaccount balance -195:25

Legend Colour selection: You can also choose the legend color of preference for each status on display.

Monthly time report: Another option available in the show information window is the selection of the monthly time report.

The image shows a user profile for Robert Leitner. It includes a silhouette placeholder for a profile picture, the name 'Robert Leitner', and a status of 'Present'. Below this, it lists 'Today's working hours' as 05:12 Hours worked, 00:00 Hours Pause, and 01:00 Hours Pausetime left. The balance is shown as -194:58 Hours. A 'Time Report' button is highlighted with a red circle and a blue arrow. Below the balance, it states 'Totalvacation: 15,00 Days' and provides a summary table of vacation days.

open	:	15,00	planned	:	00,00
taken	:	00,00	unconfirmed	:	01,00

Once you click on the **Time report** button  , automatically the existing month's report is displayed. (See for more details in section Report procedures.)

Absence Overview and Absence Request

In this section, we see how to display absence overviews and request for an absence. The absence reasons could be vacations, sick leave, etc.

Absence Overview

Absence overview can be displayed through **Administration** → **Absence** Overview. The display can be individual or group of employees depending on the specified data for selection. Let's assume we need to display the overview for all employees, then it looks like this:

Do you want to accept the Absence request?

Reason

0 / 20

ACCEPTDECLINE

Then Provide the reason and click on Accept or Decline.

Another procedure for Absence Request goes through the main menu Absence Request. The absence status could be for a number of reasons such as Sick leave, vacation, public holidays, reduced time of work, or other. To do this,

Step 1: Click on the display button on the top left corner of the main window. Then click on

Absence request. Absence request

Step 2: Provide the reason for the absence from the drop-down list. And also, the date that this absence to be applicable for. Notice that the legend colour for each type of activity is displayed below the calendar table.

Step 3: Click on **Request Absence**

Note: Once the absence is requested, whoever the manager in COBI.time is or the team leader in the respective department will get the notification. Then the approval decision will be made.

Time Spent on a Project

In COBI.time, it is possible to track total amount of time spent on a project. Employer will be able to check the employees working time on a specific project stages.

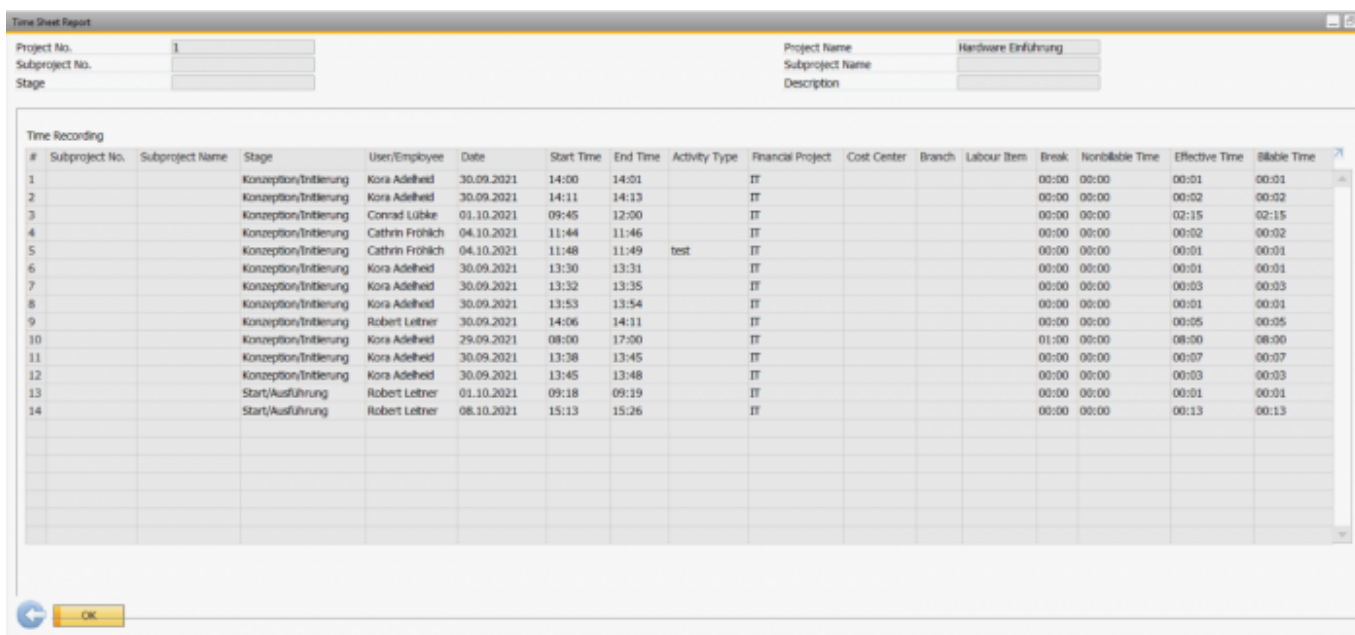

Step 1: Please open **Project** section in the SAP Business One and select a project

Step 2: Right click and select **Time Sheet Report** .You will see the page below. Select the project stage and click **OK**

Step 3: Here you can find all project times that have been booked for this project.

Working with Manual Timekeeping and User Administration

Manual Timekeeping

The Manual Timekeeping process provides detailed information for you to include in order to record work time. Manual timekeeping can flexibly be used especially for teams with flexible schedules. To organize timekeeping with manual entry, use Manual Timekeeping to allow you to log your time expenses with a detailed breakdown of the time spent. The details you are required to include are date, Nonbillable time, Start and End time, Break-time, Customer, Project, Service call, project stage, activity type, and cost centre.

Step 1

Open Manual Timekeeping window

Main Menu → Manual Timekeeping

Step 2

Enter the required information; for instance, Date, Nonbillable time, start time, end time, pause time, customer, project type, Service call, Project stage, Activity type, and cost centre.

Step 3

To complete the process, click on **Send** or if you no longer want the data, click on **Delete**.

Note: You can only book manually when there is no existing time block. You cannot book time while you are working or work is in progress. Since service calls and projects are permission tied, you may find the display empty unless there exists an ongoing process. You can add a cost center in this section and nowhere else.

Administration

The application of the Administration section of COBI.time enables account administrators to manage the individual users and lets them configure a number of settings for each user account. The functionalities in detail are given below:

User Administration

This section displays the available user data in COBI.time. The main user administration screen provides information about SAP Employees Id, Employees Name, SAP User Code, SAP external employee Code, User groups, and Actions.

Edit

The Edit User screen provides an option to deal with user group identifications. You can select as many user groups as per user depending on the status of each user. Then the user can have access to each relevant group data in COBI.time. You can also view and work on the user required time model and vacation account.

User Group Selection Option:

Select as many user groups as you can depending on the user authorization status. Then the user has access to each selected group data accordingly.

Time Model

Once you click on the Time Model tab of the Edit User window, you can have a time model and validation date displayed.

Note: You have a separate section on time models (section 3.2.3 on page 25) where you can add **daily- and weekly models** as required by your business.

A Warning message appears to check whether your decision is correct or not. If it is correct, Click **Ok**.

Note: You cannot delete an employee from the system. COBI.time deletes and hides them. These can be reactivated using hide or show button  from the user administration window.

If the employee has a running time account, it first closes the running time account and then deletes it.

Reset/Change Password

Users have an initially assigned password. By first time log in, users can change the **password** and give their own. You can reset or change the password to each user as required. To do this, select the relevant user and click on the Reset password button.

<input type="checkbox"/>	SAPEmpID	Name	SAP Usercode	SAP external Employeecode	Usergroups	Actions
<input type="checkbox"/>	1	Robert Leitner	manager		2, 3, 4, 5, 6, 7, 8, 9	
<input type="checkbox"/>	3	Conrad Lübke	conrad		2, 3	
<input type="checkbox"/>	4	Cathrin Fröhlich	cathrin		2, 3	

Insert the preferred password and confirm. Then click on **Save**.

The dialog box has a title "Do you want to change your password?" in red. It contains two input fields: "Insert password" and "Confirm Password", both with red borders and asterisks indicating they are required. Below the fields is a checkbox labeled "Reset password on login" which is checked. At the bottom right are two buttons: "CANCEL" and "SAVE".

General Setting

In order to work with the general setting, you need to click General settings from the main menu list.

Main Menu ⇒ Administration ⇒ General Settings

Then the following window displays:

The screenshot shows the "COBI TIME General Settings" interface. On the left is a navigation menu with "Administration" selected, and "General Settings" highlighted. The main content area contains several settings:

- Logo: A "Select file" button with "none selected" and a close icon.
- Absence reasons: A "MANAGE" button.
- Show absence requests in the presence list: A toggle switch set to "no".
- Activate booking on projects from project management?: A toggle switch set to "yes".
- Activate authorization system for projects from project management?: A toggle switch set to "no".
- Activate booking on service calls?: A toggle switch set to "yes".
- Activate authorization system for service calls?: A toggle switch set to "no".
- Activate posting to financial projects?: A toggle switch set to "yes".

A "SAVE" button is located at the bottom center of the settings area.

In this section, you can **change the logo** by selecting the **select file** option . Then you can add a new Logo by uploading it.

You can also manage Absence reasons by selecting the **Manage** button. Once you click on Manage, the window below displays. Then select which reason for absence to be in this context or add a new absence reason by clicking at the plus sign on the top right corner of the screen. Then click on **Save Absence**.

Absence Administration

Requestable	id	Name	Farbcode
<input checked="" type="checkbox"/>	1	Name Krankheit	Farbcode Brown
<input checked="" type="checkbox"/>	2	Name Urlaub	Farbcode Indigo
<input checked="" type="checkbox"/>	3	Name Kurzarbeit	Farbcode Red
<input checked="" type="checkbox"/>	4	Name Sonderurlaub	Farbcode Violet

SAVE ABSENCE

Activation /Deactivation

COBI.time offers activate/deactivate options to reorganize the product according to your company`s needs.

- Show absence requests in the presence list
- Activate booking on projects from project management
- Activate authorization system for projects from project management
- Activate booking on service calls
- Activate authorization system for service call
- Activate posting to financial projects

Time models

In the application, you can set the working time account according to your requirements. For instance, how do you want the daily time model or weekly time model to look like and displayed in.

You can open the **Time Models window** from the main menu. To do this,

Main menu ⇒Administration⇒ Time Models

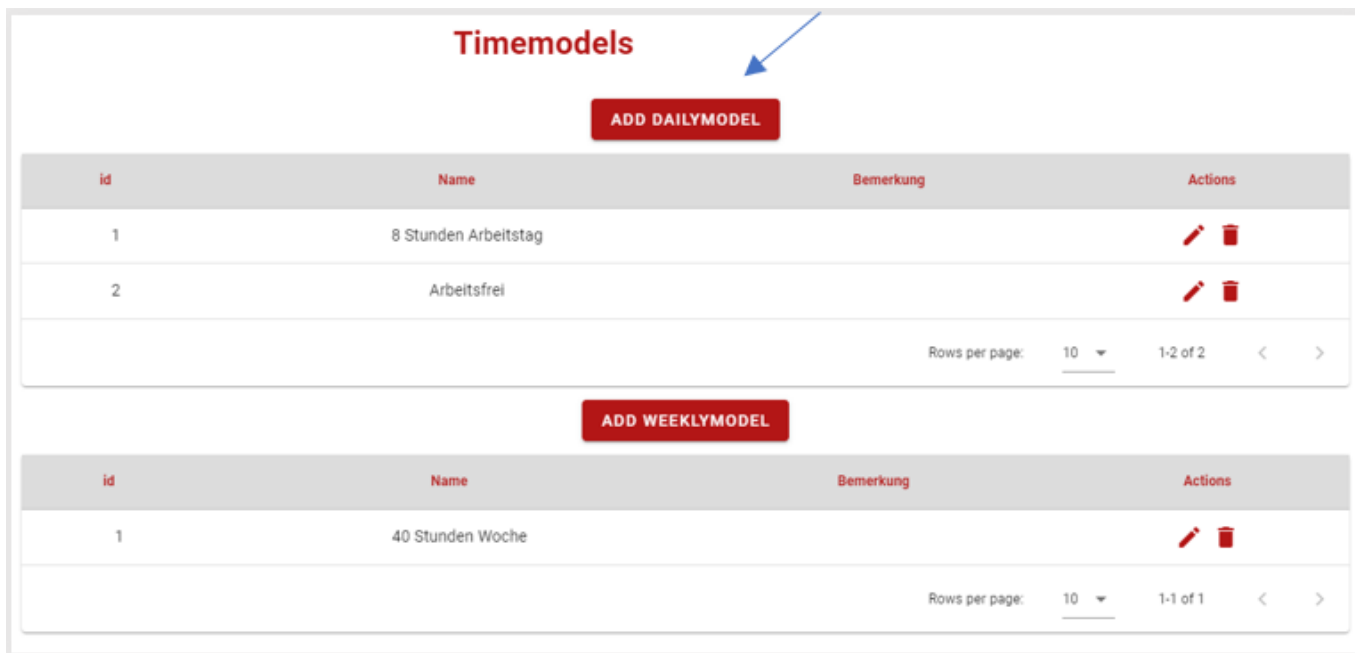

Setting Daily Time Model:

For a particular working day, you can **add**, **edit** or **delete** a Daily model name and the necessary information.

Add New Daily Model

Step 1: Add a new daily model:

Main Menu → Administration → Time models → Add Daily model

Step 2: Include the relevant data such as a daily model name, standard daily work time, start and end work time, Pause (break time) as well as comments in the displayed window.

New Daily Model

Dailymodel name _____ Debit Worktime _____
0 / 50

Worktime

⌚ Come _____ X

⌚ Go _____ X

Pauses

⌚ Pause 1 in hours _____ X

Remark

0 / 254

ADD DAILYMODEL

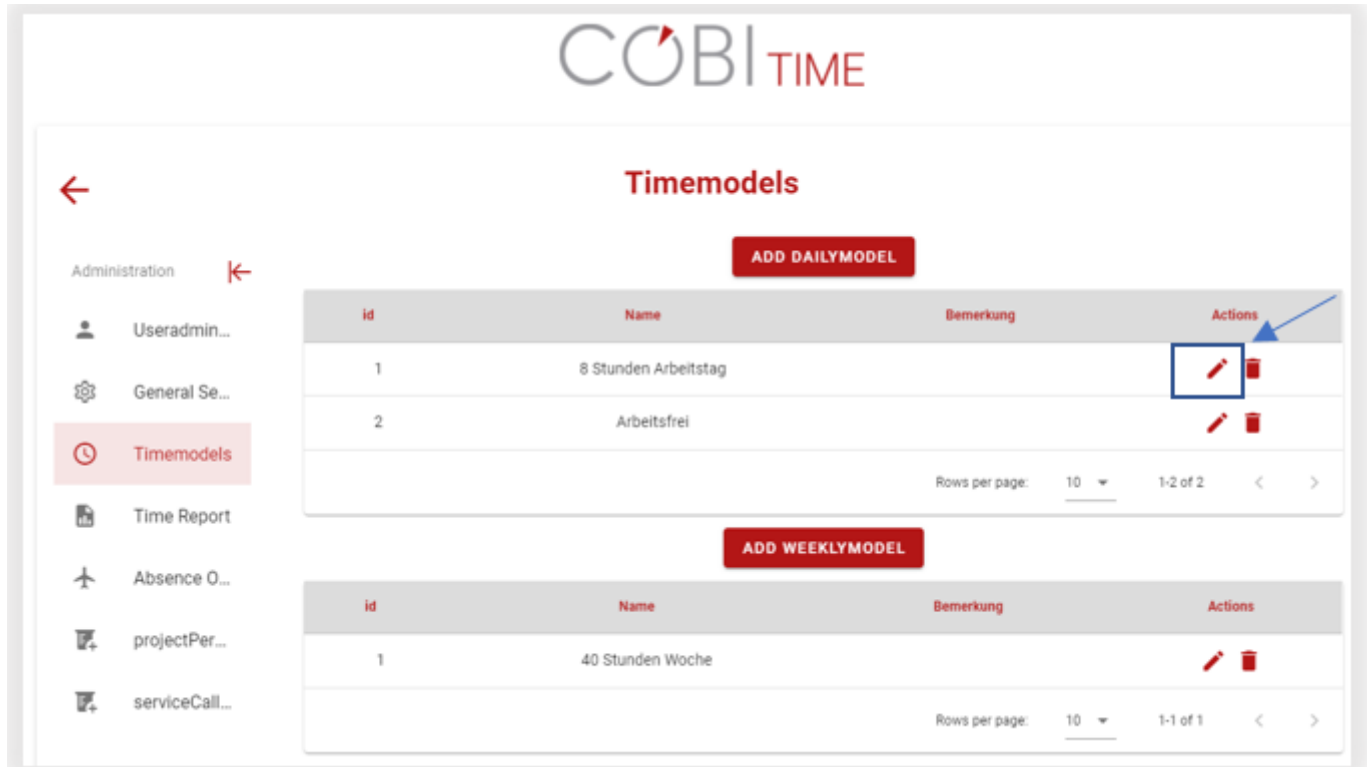

Step 3: Click on Add Daily model button

Note: If no action is required and you want to cancel it, click outside the **Time models** window

Edit Daily Model

Editing the daily model of the existing records is applicable in COBI.time. To do this:

Step 1: click on the **Edit button**

Step 2: Take an action to make the necessary changes i.e. editing the data that requires any Change

Edit Daily Model

Dailymodel name: 8 Stunden Arbeitstag Debit Worktime: 08:00

20 / 50

Worktime

Come: 08:00 ✕

Go: 17:00 ✕

Pauses

Pause 1 in hours: 01:00 ✕

Remark

0 / 254

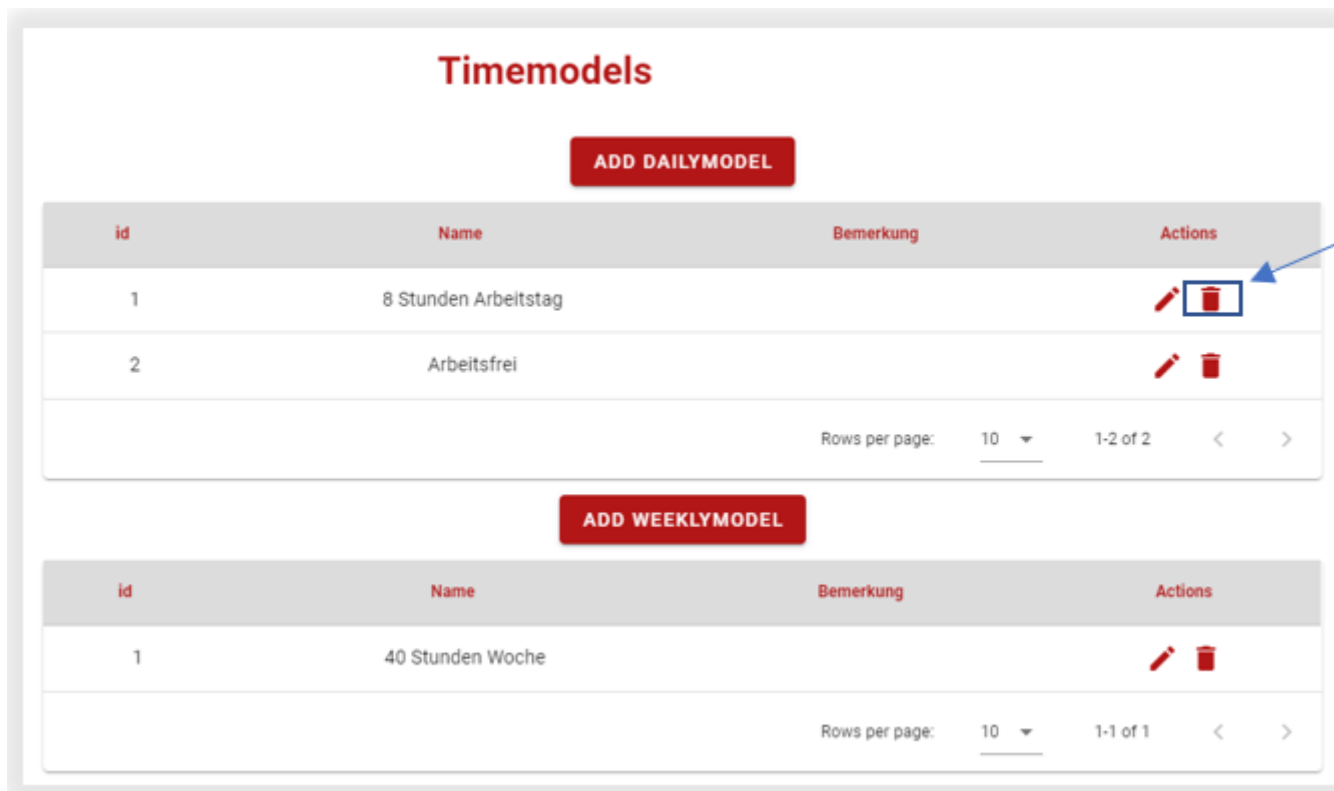

SAVE DAILYMODEL

Step 3: To save changes, click on Save Daily model

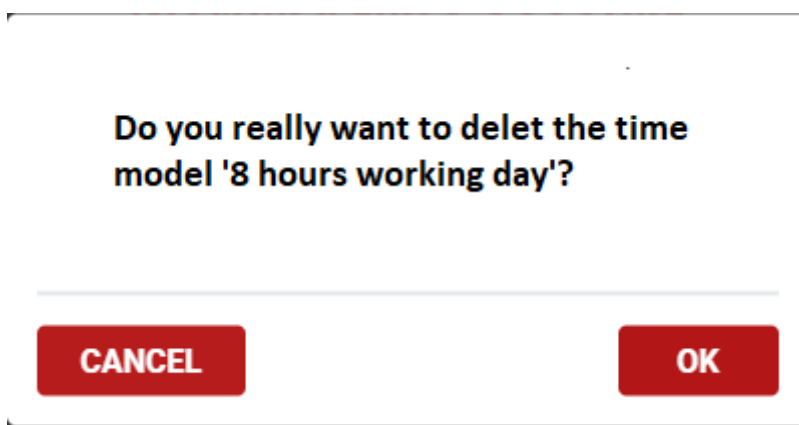

Delete Daily Model

Deleting the daily model is possible only if there is no active time account with a weekly model that is connected to this daily model. For those in active time account that requires deletion, use the Delete button to take the action of deletion. To do this:

Step 1: Click on the **Delete button**.

Step 2: Read the message carefully. If the decision is correct, click on **OK** to delete the record. If you are unsure about that click on **Cancel**.

Setting Weekly Time Model

Similar to the daily time model setting, you can also add, edit or delete the weekly time model. The weekly time gets calculated automatically. This depends on every workday you selected in the daily models. However, when editing is required you should do this:

Add New Weekly model

The screenshot displays the 'Timemodels' management interface. At the top, there is a red button labeled 'ADD DAILYMODEL'. Below it is a table with the following data:

id	Name	Bemerkung	Actions
1	8 Stunden Arbeitstag		
2	Arbeitsfrei		

Below the first table is a pagination control showing 'Rows per page: 10' and '1-2 of 2'. A blue arrow points from this area to a red button labeled 'ADD WEEKLYMODEL'. Below this button is a second table with the following data:

id	Name	Bemerkung	Actions
1	40 Stunden Woche		

At the bottom of the second table is a pagination control showing 'Rows per page: 10' and '1-1 of 1'.

Step 1: Main Menu → Administration → Time models → Add weekly model

New Weekly Model

Weeklymodel name: 40 Weeklyworktime: 56:00

2 / 50

Monday	8 Stunden Arbeitstag	X
Tuesday	8 Stunden Arbeitstag	X
Wednesday	8 Stunden Arbeitstag	X
Thursday	8 Stunden Arbeitstag	X
Friday	8 Stunden Arbeitstag	X
Saturday	8 Stunden Arbeitstag	X
Sunday	8 Stunden Arbeitstag	X

Empty the timeaccount to month start (Temporary basis for example.)

Remark

0 / 254

ADD WEEKLYMODEL

Step 2: Include the relevant data such as the weekly model name and weekly work time.

Step 3: For each day of the week, you can select the standard working time or any available data from the list. It could be 8 hours of standard work times or free work time. You can also add remarks if deemed necessary.

New Weekly Model

Weeklymodel name: 40 Weeklyworktime: 08:00

2 / 50

Monday	8 Stunden Arbeitstag	X
--------	----------------------	---

Step 4: Click on Add weekly model button

Edit weekly model

Editing the weekly model of the existing records is also available in COBI.time. To do this:

Step 1: Main Menu → Administration → Time models → then click on the **Edit button** as shown below

COBI TIME

Step 3: Select the day and recurrence for automatic booking

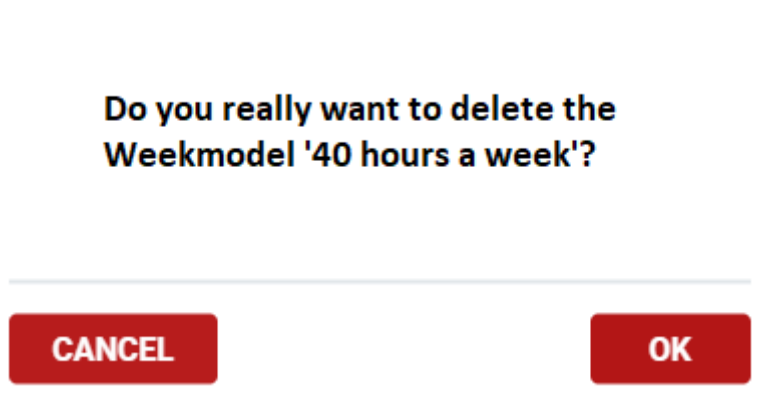

Delete weekly model

Deleting weekly model is possible only if there is no active time account with that weekly model. If deemed necessary therefore, the action will be taken using the **Delete button**. To do this:

Step 1: Click on the **Delete button**.

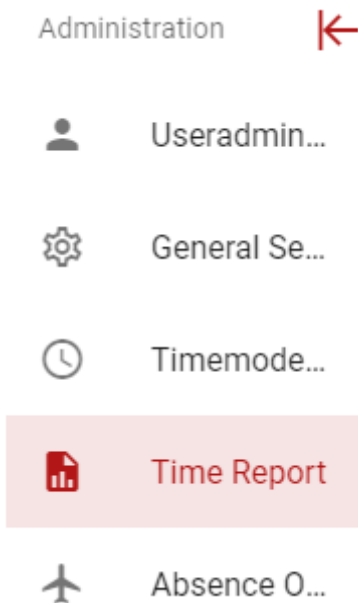

Step 2: Read the message carefully. If you are sure that you are making the correct decision, click **OK** and the record will be deleted. If you are unsure about that, click **Cancel**.

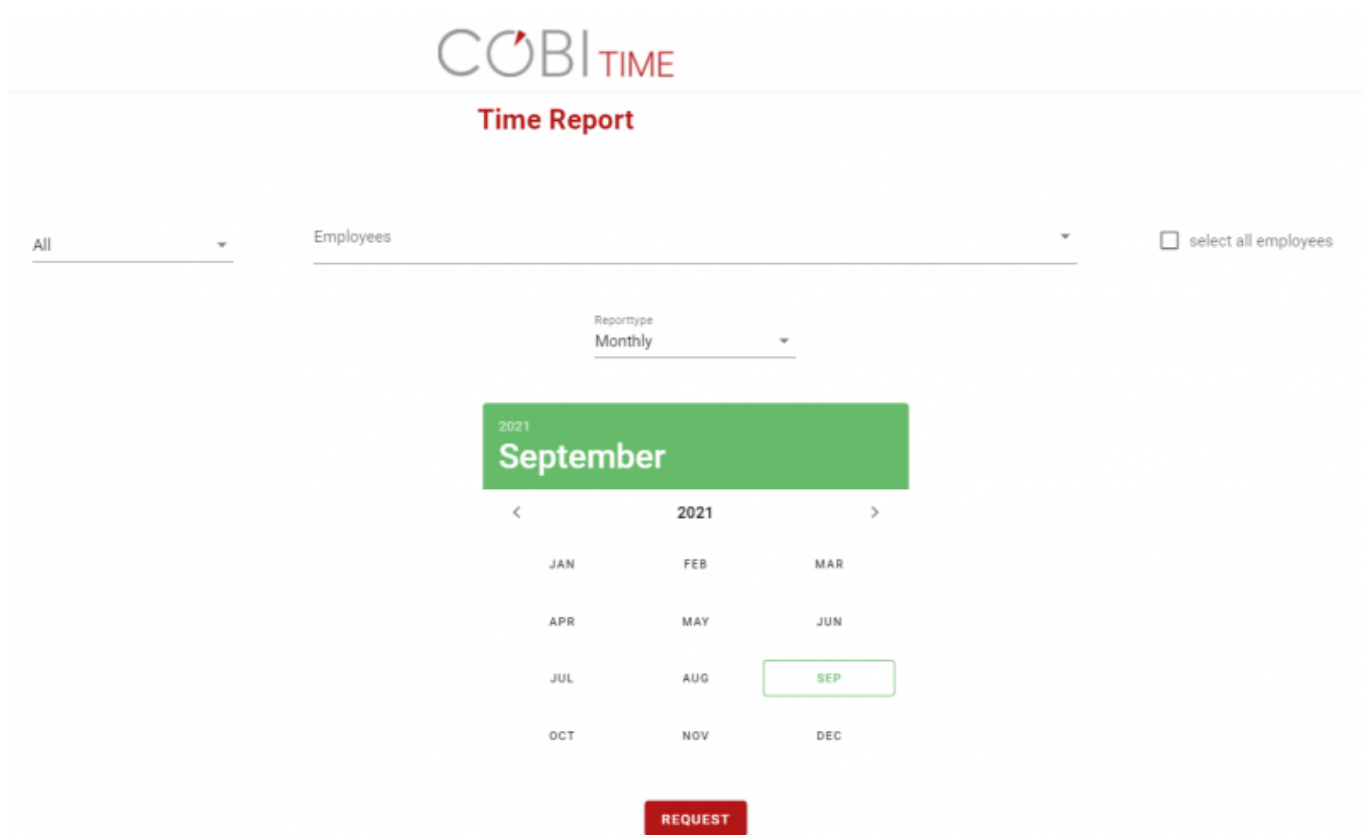

Time Report

In this section, you also have an option to view the time report for a particular period of preference. To open the select time report window, click on the Time report button of the Administration menu.

Main Menu → Administration → Time Report

Then it displays:

Select the relevant user, year, and month for which the report is going to be requested. Then click on **Request**. Finally, you will get the requested period report displayed as:

Time Period	Time Block	Is	Working Time Debit	Balance
Samstag 2020-08-01		00:00	00:00	-188.60
Sonntag 2020-08-02		00:00	00:00	-188.60
Montag 2020-08-03		00:00	08:00	-196.60
Dienstag 2020-08-04		00:00	08:00	-204.60
Mittwoch 2020-08-05		00:00	08:00	-212.60
Donnerstag 2020-08-06				
Freitag 2020-08-07				
Samstag 2020-08-08				
Sonntag 2020-08-09				

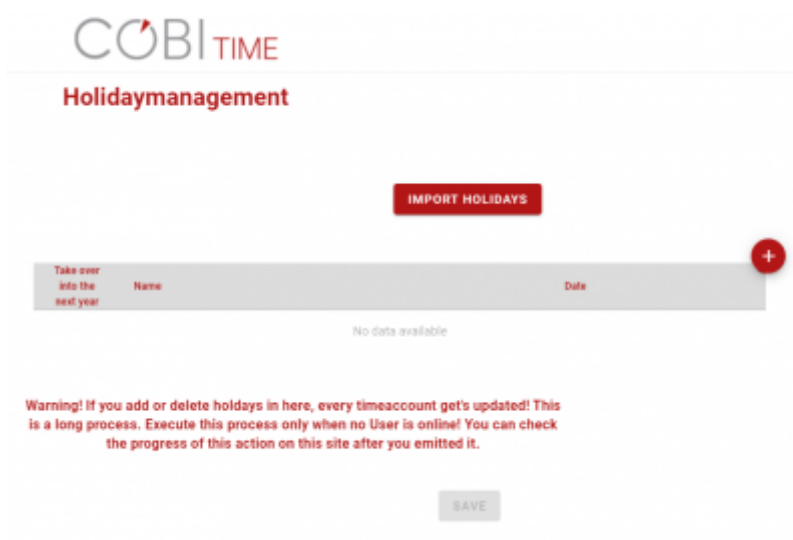

You can produce an Excel file of this report by clicking at the **Export** tab on the top right corner of the opened window.

Holiday Management

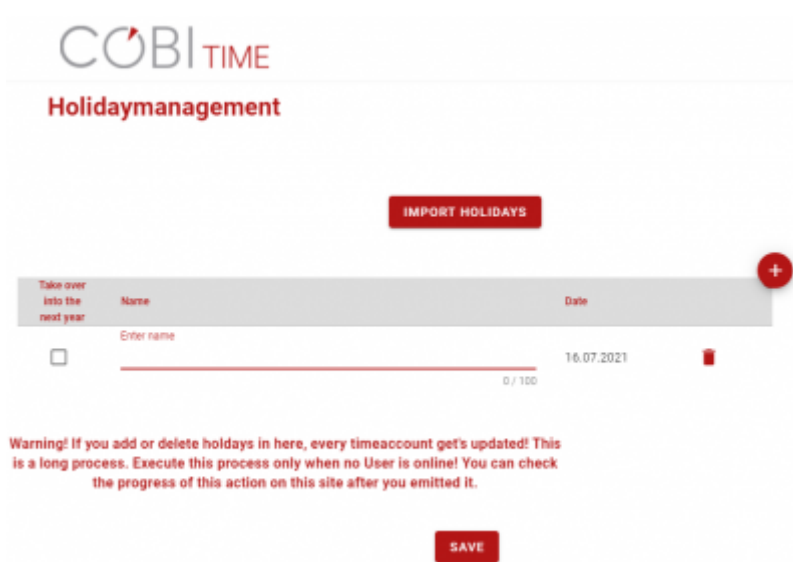

Holiday management is also another available option in COBI.time. You open the Holiday Management window from the main menu as **Administration → Holiday Management**.

Notice:

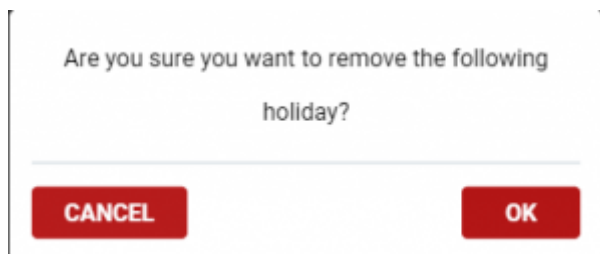

In this section, it is important to notice that ever Time-account gets updated when action on adding or deleting holidays is carried out. Therefore, you have to make sure that no User is online in order to execute the process.

You can create a new holiday by clicking on the plus sign . Include the name and click on **save**. Click on the **Tickbox** if there is a need to take over the holiday name into the next year.

If the holiday name is no more needed, you can remove it by clicking on the Trash button

Click **ok** to confirm the deletion process. If no action is required, click on **Cancel**.

Import public holidays

Baden-Württemberg ▼

State

<input type="checkbox"/>	Name	Date
<input type="checkbox"/>	Neujahrstag	01.01.2022
<input type="checkbox"/>	Heilige Drei Könige	06.01.2022
<input type="checkbox"/>	Gründonnerstag	14.04.2022
<input type="checkbox"/>	Ostermontag	18.04.2022
<input type="checkbox"/>	Pfingstmontag	06.06.2022
<input type="checkbox"/>	Fronleichnam	16.06.2022
<input type="checkbox"/>	Tag der Deutschen Einheit	03.10.2022
<input type="checkbox"/>	Reformationstag	31.10.2022
<input type="checkbox"/>	Allerheiligen	01.11.2022
<input type="checkbox"/>	1. Weihnachtstag	25.12.2022
<input type="checkbox"/>	2. Weihnachtstag	26.12.2022

IMPORT

You can also the import Holidays using Import Holidays button . The window on the left displays. Then select from the given list and click on the **Import** button to execute the process.

Note that the yearly holidays depend and created based on the employment starting date.

Annual Holidays

24

Start Holidays

24

In this case, the annual holidays are the number of holiday days an employee gets and assuming that the starting date was January and full holiday days are considered for the current year

Annual Holidays 24

Start Holidays 24

Holiday days expire next year

Assuming a new employee started in the middle of the year (e.g. in the month of June), the holiday days for the year are calculated pro rata. If these are e.g. 24 days (normally the leave is based on the contract), the employee has only 12 days of leave left for the current year. In the following year, the employee then receives the annual leave plus the remaining leave days (only if the option “Leave days expire next year” is ticked).

Annual Holidays 24

Start Holidays 12

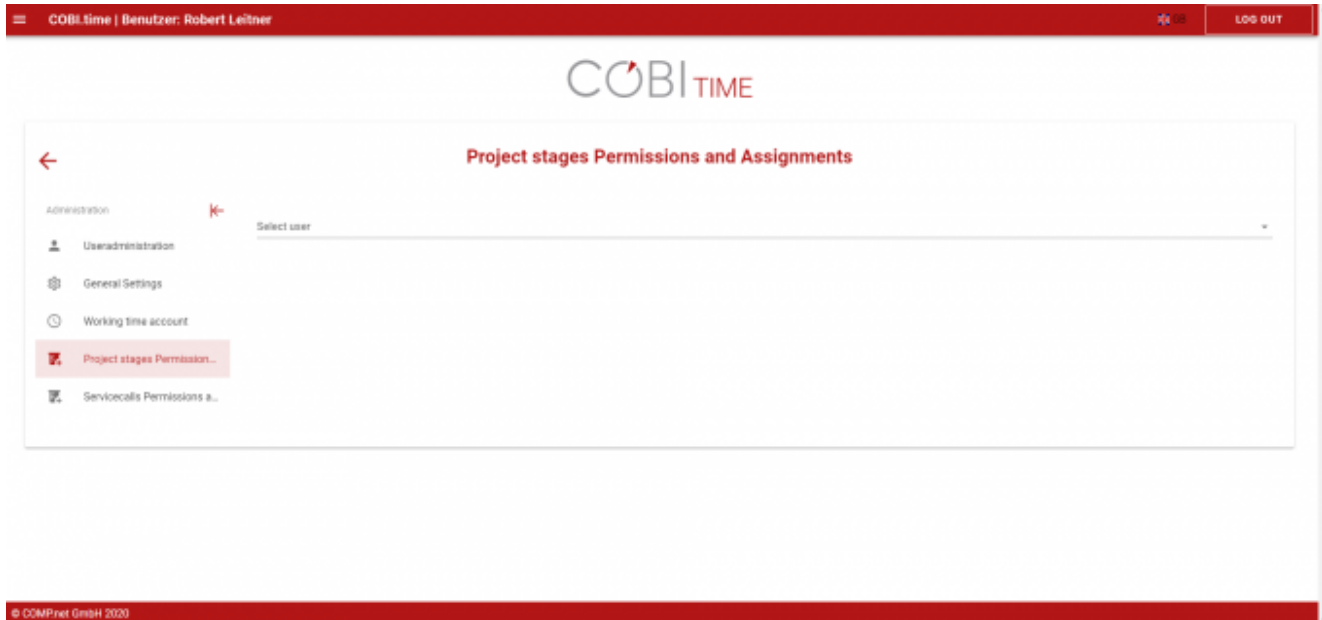

Holiday days expire next year

Then the display will be as

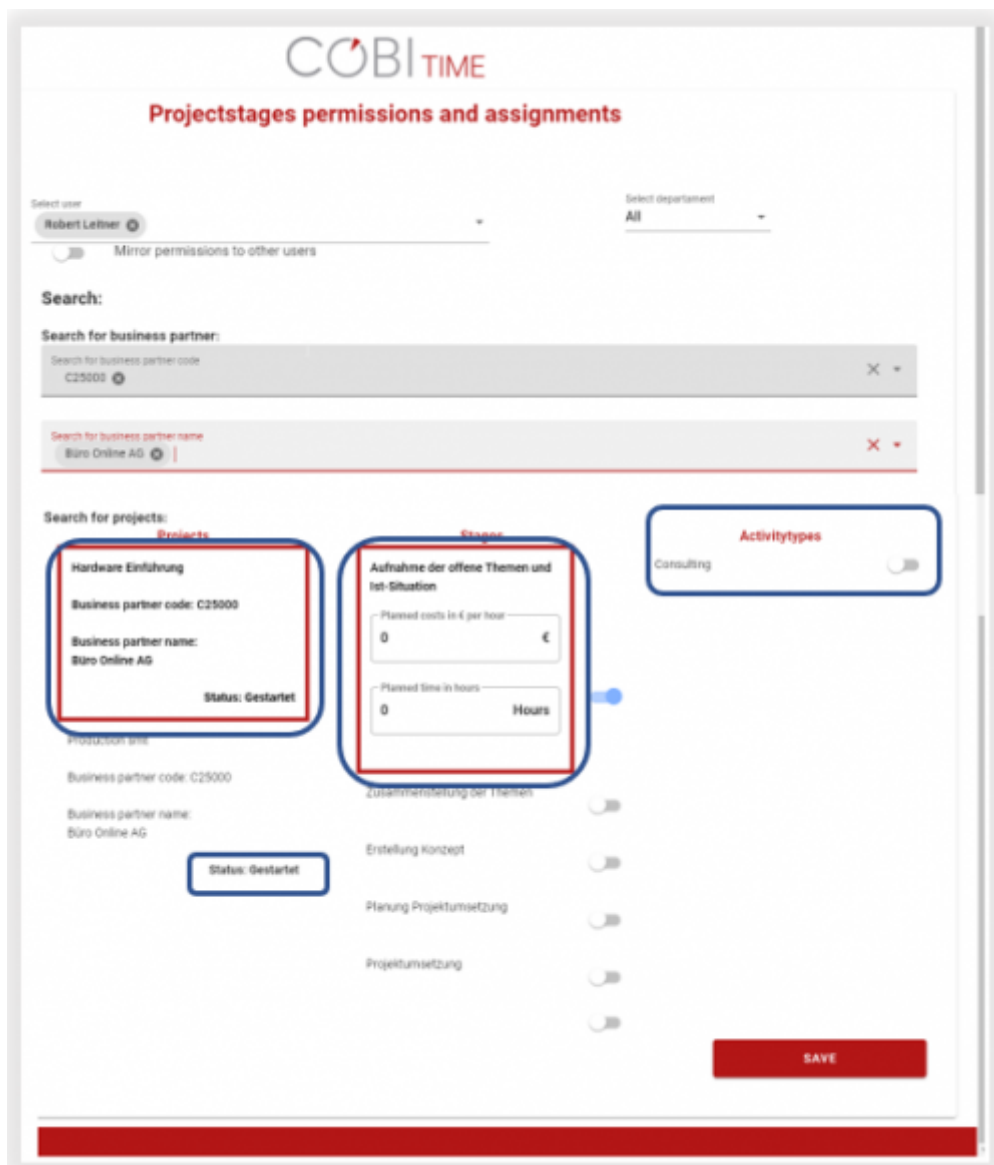

Project Stages Permissions and Assignments

The project stages permissions and assignments section of COBI.time provides an option for you to record the work time for a particular project related to business partners. To select users for action in the project stages permissions and assignments, do this:

Step 1: Main Menu → Administration → Project Stages permissions and assignments → select user

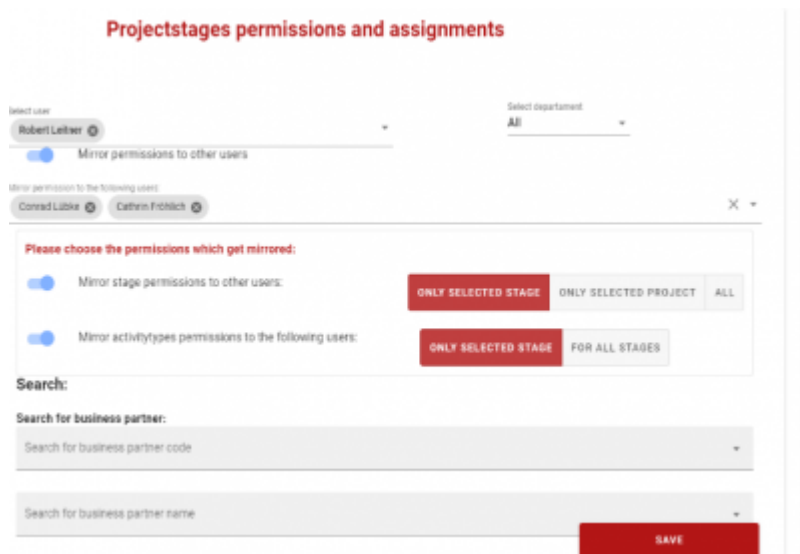

Step 2: Once the user is selected, you can provide relevant information related to Business partners, project type, Activities types, planned cost per stage, planned time per stage, or status.

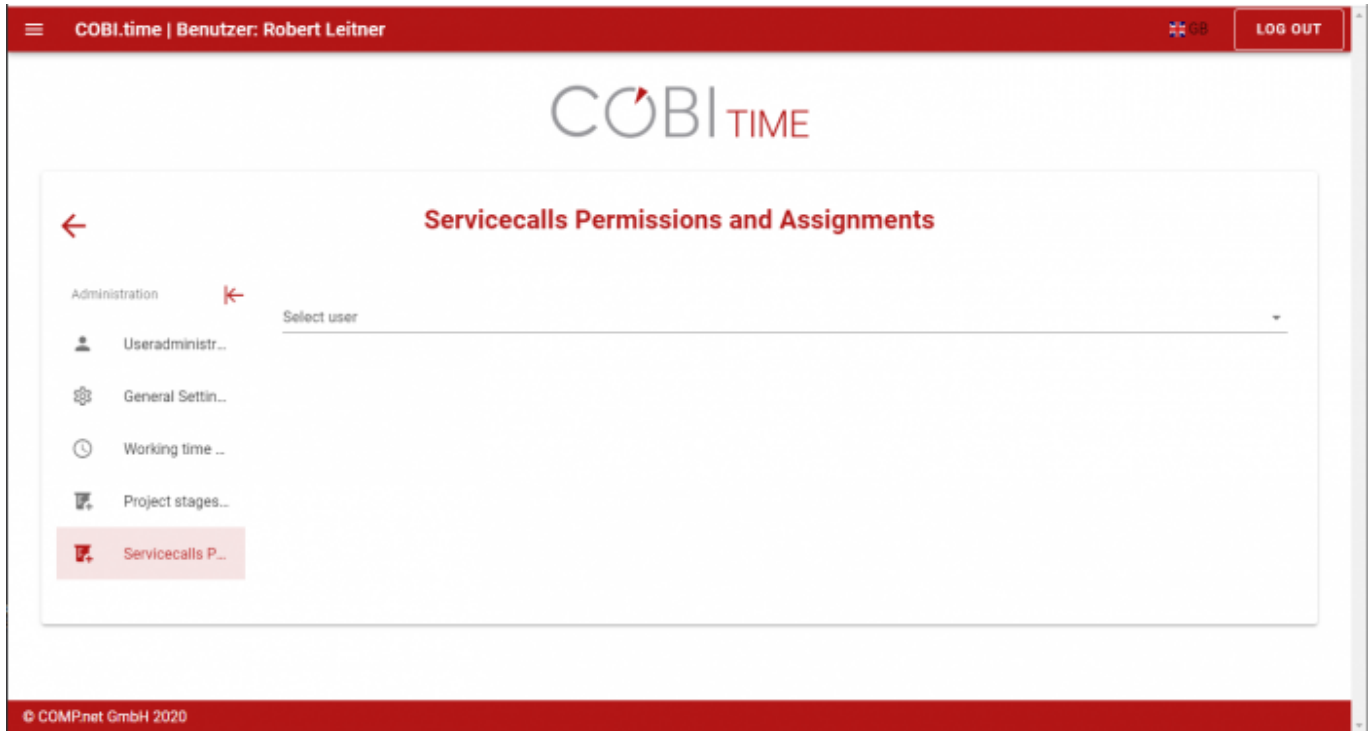

Step 3: Click on Save

Mirror Permissions

In this area it is also possible to give permissions to other users at the same time. For example, several users can be given permissions for a project that Robert Leitner has in progress. Click on the option Grant permissions to other users and then select the desired users from the drop-down list. You then have the option to select the appropriate permissions, e.g. levels or activity types, etc. Then **save the action.**

==== Service Calls Permissions and Assignments ==== In this section, you can display and work with the service calls permissions and assignments related to each user. The process displays information about the business partner, service calls and activities. To do this: Step 1: Main Menu → Administration → Service Calls Permissions and Assignments →select user

Step 2: Once you identify the user from the list, you can have the following information displayed:

Servicecalls Permissions and Assignments

Select user

SAVE

Step 3: To save changes, click Save

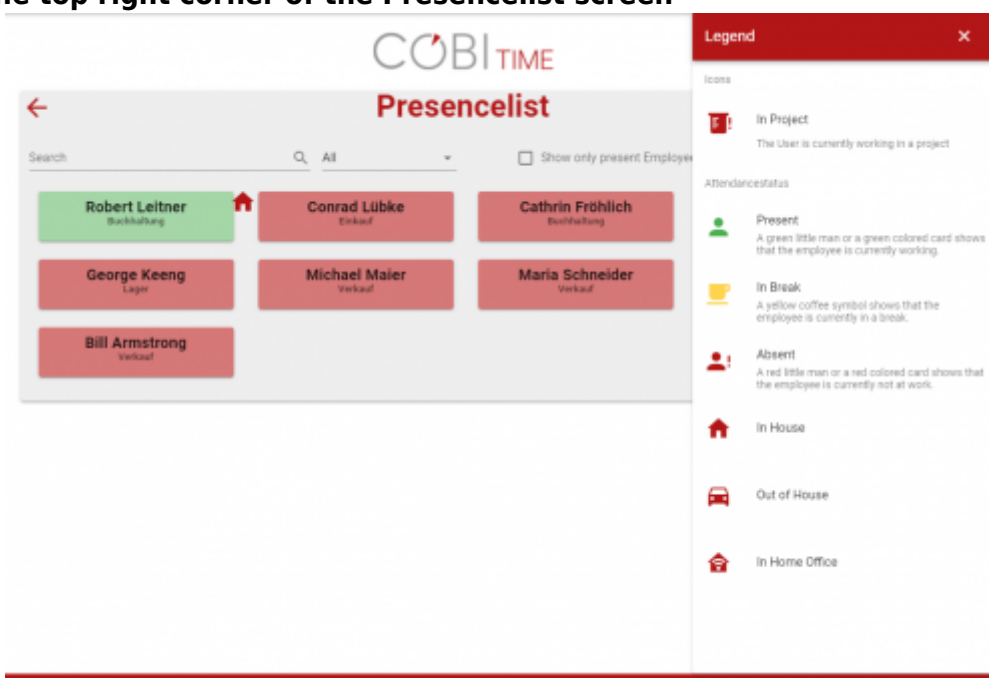

==== Attendance list ==== Status Show and Change Mode of Attendance List ==== The status of the presence list of employees is available for display in COBI.time. To do this: Step 1: Main Menu à Presence List or by clicking on the Presencelist Icon as displayed below:

Step 2: Select the relevant search options for the display. Type a user or department name in the search field to find the required list. You can select the option All to display all available lists or select a specific department from the drop-down list to display what belongs to that particular department. If you want to see only those employees who are present, tick on the checkbox that stands for Show only present Employees. The following displayed screen is in card mode.

Legend You can see the legend type for each status of the attendance icon such as in project, present, in a break, in-home office, in house, out of the house, and absent. Each of these is represented with an individual icon. To do this: Click on the Show Legend button on the top right corner of the Presencelist screen

==== Password Settings ==== In this section, you can set your password as you wish. You can

reset, activate, or deactivate your password. To do this: Main Menu → Password Setting Then the

Password Settings

following window displayed:

In order to reset/change the password, click on the Reset Password button. Then asking you to confirm.

Do you want to change your password?

Insert password

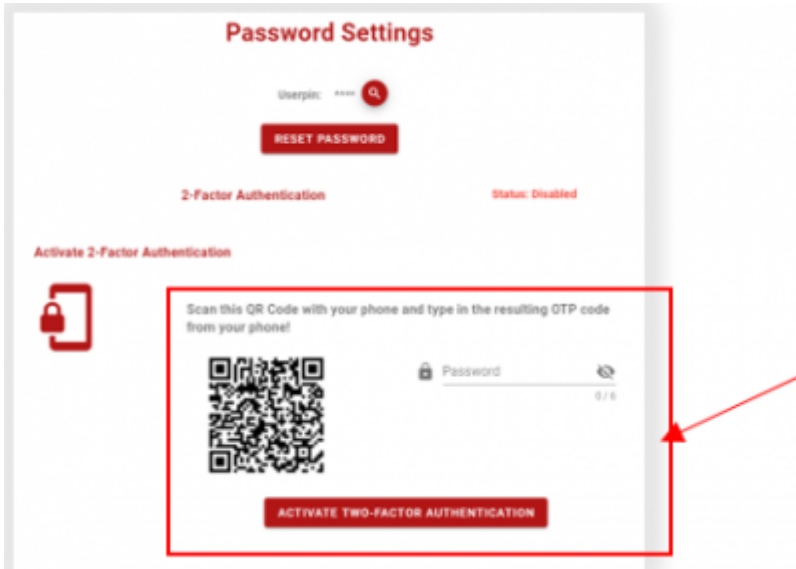

•

Passwort bestätigen

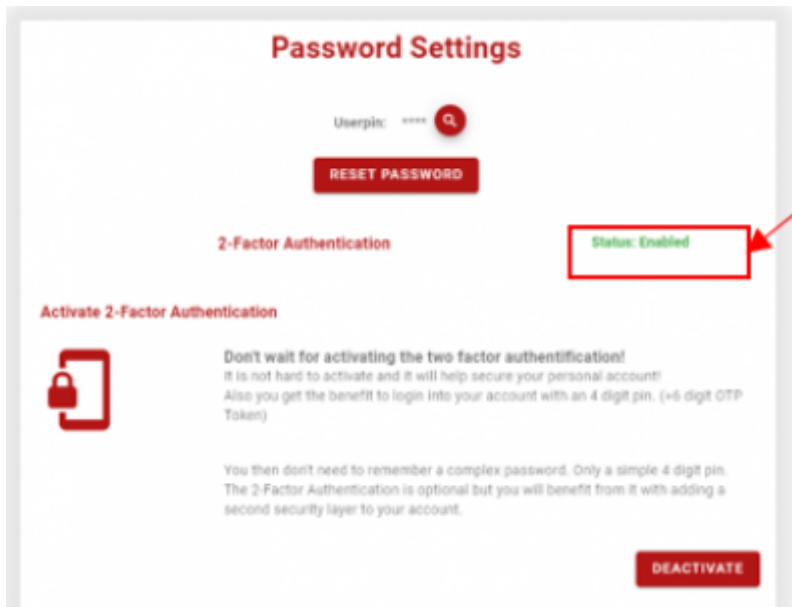

•

CANCEL SAVE

Insert the preferred password and confirm. Then click on Save. Look at the status of the 2-Factor Authentication. You can enable or disable this status by clicking at the Enable **or** Disable **button at the bottom right of the Password Settings window. To enable the authentication, click on Enable button. You will be asked to activate 2-Factor Authentication. To do this: - Scan the QRCode with your mobile phone - Get an OTP code - Insert the OTP Code in the Password field - Click on Activate 2-Factor Authentication**

Then the status is enabled as

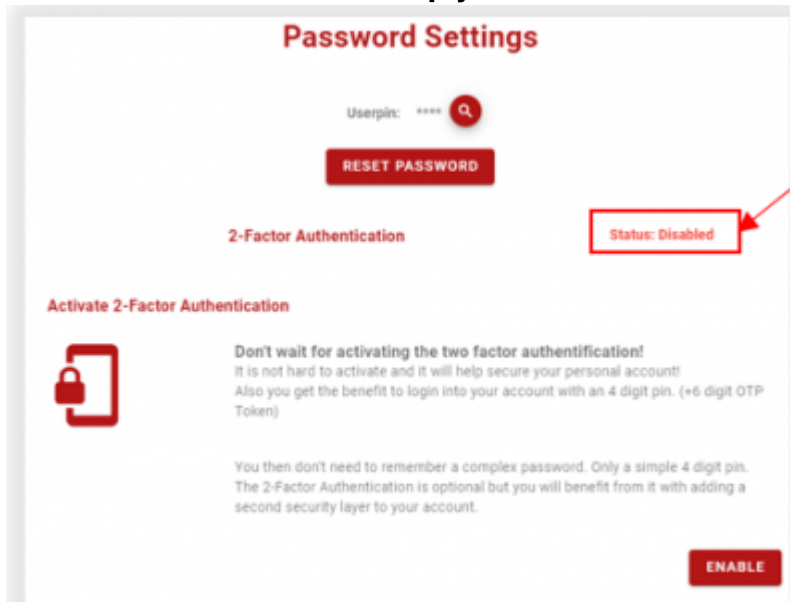

displayed below:

Deactivating 2-

Factor Authentication is simply click on Deactivate Button, then it will automatically be

changed to Disabled status.

The reason for this function is that you can log into COBI.time from the local network using the 4-digit pin function. However, this is insecure if COBI.time is accessible via the Internet. Therefore, it is necessary to implement 2-factor authentication to enable logging in with a 4-digit pin code and make access more secure. So you need the 6-digit temporary token plus the 4-digit pin code to log in.

Note: Absence request is already covered in section ===== Reporting Procedures
===== The report can be available at several stages where a monthly time report is required for a relevant year on selection. The the report can be exported into an Excel file. You can also view the attendance list as one report for all employees or a particular group as you wish. This has been explained based on their relevance in the previous sections. Here below as an example of a time report. The procedure is: Step 1: Main Menu → Administration → Time report button

User Administration

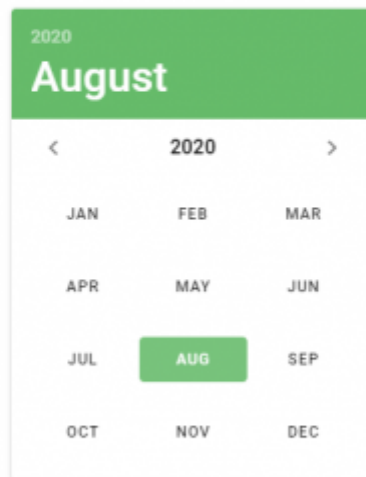

<input type="checkbox"/>	SAPEmpID ↑	Name	SAP Usercode	SAP external Employeecode	Uvergroups	Actions
<input type="checkbox"/>	0000	admin	admin		1

Summary

COBI.time is an efficient personnel time recording in SAP Business One for modern medium-sized

companies. It is a contemporary solution that meets all the requirements of modern working time recording anywhere and at any time.

Working with employee time records offers great advantages and simplifies the administration process considerably. You can see attendance status and mail notifications at a glance as soon as you open the main COBI.time window. Applying time recording by work category is also possible in COBI.time. The history of the recorded data in the form of daily or monthly time records can also be displayed.

Whenever you need and want to process detailed information on employees' time records, you can use manual time recording flexibly.

COBI.time allows administrators to manage individual users and configure a number of settings for each user account according to their authorisations and responsibilities. For example, importing SAP users, editing users (user group identifier, time model and leave account), deleting a user, resetting password, time report, absence overview are available in this area.

In the general settings section of COBI.time, it is possible to insert a new logo, change the existing logo or set the default logo again. You can also manage the details of the reasons for absence in the general settings window. Working with working time accounts is also possible. In the application, you can easily set up a working time account according to your wishes and operational requirements. Here, for example, you define how the daily time model or weekly time model should exist in the system.

Working time recording for a specific project in relation to business partners is also done within the project phases Authorisations and Assignments in COBI.time. Working with the authorisations and assignments for service calls related to each user, with the relevant information about the business partner, service calls and activities, is done in the Authorisations and Assignments for Service Calls section on the User Management tab.

Finally, the status display and change mode of the attendance list as well as the absence request functions of COBI.time are also available. In addition, the functionality of 2-factor authentication is implemented and covered in COBI.time.

COBI.time thus has a strong functionality for reliable and efficient time recording of employees in the administrative processes of a company.
