Setting up the COBI.wms Emulator

Requirements

- Android Studio
- COBI.wms APK file

Step-by-step guide to installing the Android Studio Emulator and setting up a virtual machine.

Step 1

Visit the website Android Studio

Step 2

Download the latest version of Android Studio.

Step 3

Install the downloaded .exe file.

Step 4

Open Android Studio and navigate to the "Device Manager" tab. Click the plus icon and select "Create Virtual Device".

		thath \sim	Version control \sim		Add Configuration \vee		o ×

Tablet	Pixel 3 XL			1440x2960	560dpl	So: lege	
Wear 05						DHISE SHORE	
Desktop	Peel 2 XL			1440x2880		6.9° 2000pm	
TV						$\langle \gamma \rangle$	
Automotive				1440x2560			
Legacy							
				1768x2208			
Now Hardware							
۲						Previous Not Carcel Find	

Step 6

Select an operating system (we recommend Android 8.1 or higher).

3/7

Step 7

Name the virtual machine, check all settings, and then click "Finish".

Step 8

Start the virtual machine.

Last update: 2024/06/07 09:47

Step 9

Note that the first start may take a little longer.

5/7

Step 10

Drag the COBI.wms APK file into the virtual machine to automatically install the app.

Step 11

Configure COBI.wms with the desired database configuration (On-Premise or Cloud). The diagram shows the On-Premise version.

Einstellungen		60° 0%				
MANAGEMENT-DB	MANDANTEN	DEMO				
MS SQL	⊖ hana					
	—

VERBINDEN						
		-				
		1:1				

Step 12

The device ID must now be stored in the database with the license key.
