

Setting up the COBI.wms Emulator

Requirements

- Android Studio
- COBI.wms APK file

Step-by-step guide for installing the Android Studio Emulator, setting up a virtual machine and setting up the COBI.wms APK.

Step 1 Website

Visit the website [Android Studio](#)

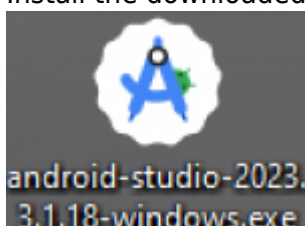

Step 2 Download

Download the latest version of Android Studio.

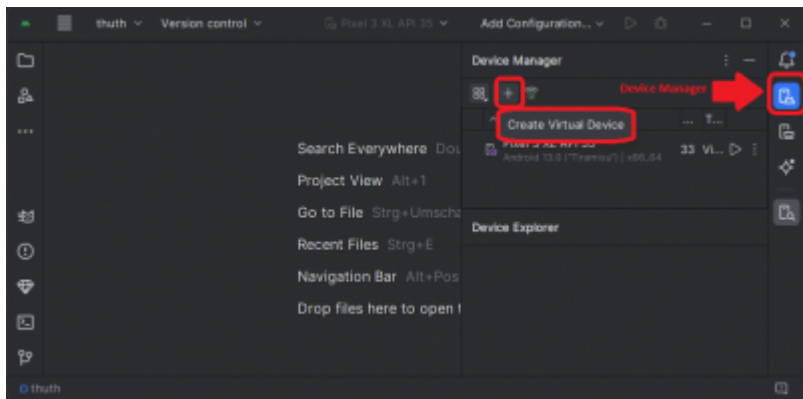

Step 3 Install

Install the downloaded .exe file.

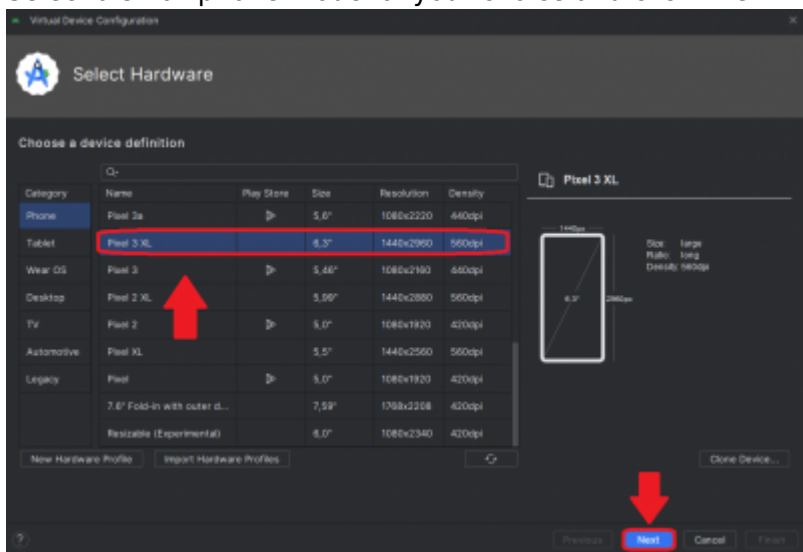

Step 4 Open

Open Android Studio and navigate to the “Device Manager” tab. Click the plus icon and select “Create Virtual Device”.

Step 5 Select

Select a smartphone model of your choice and click “Next”.

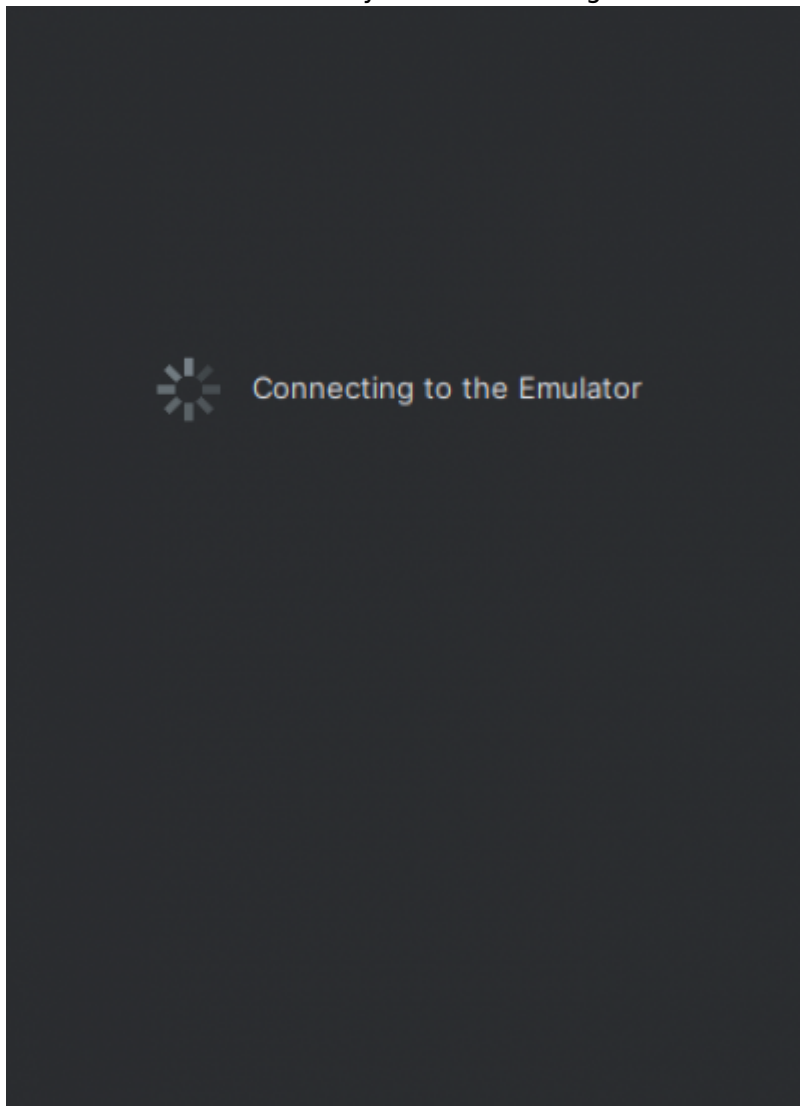

Step 6 Operating System

Select an operating system (we recommend Android 8.1 or higher).

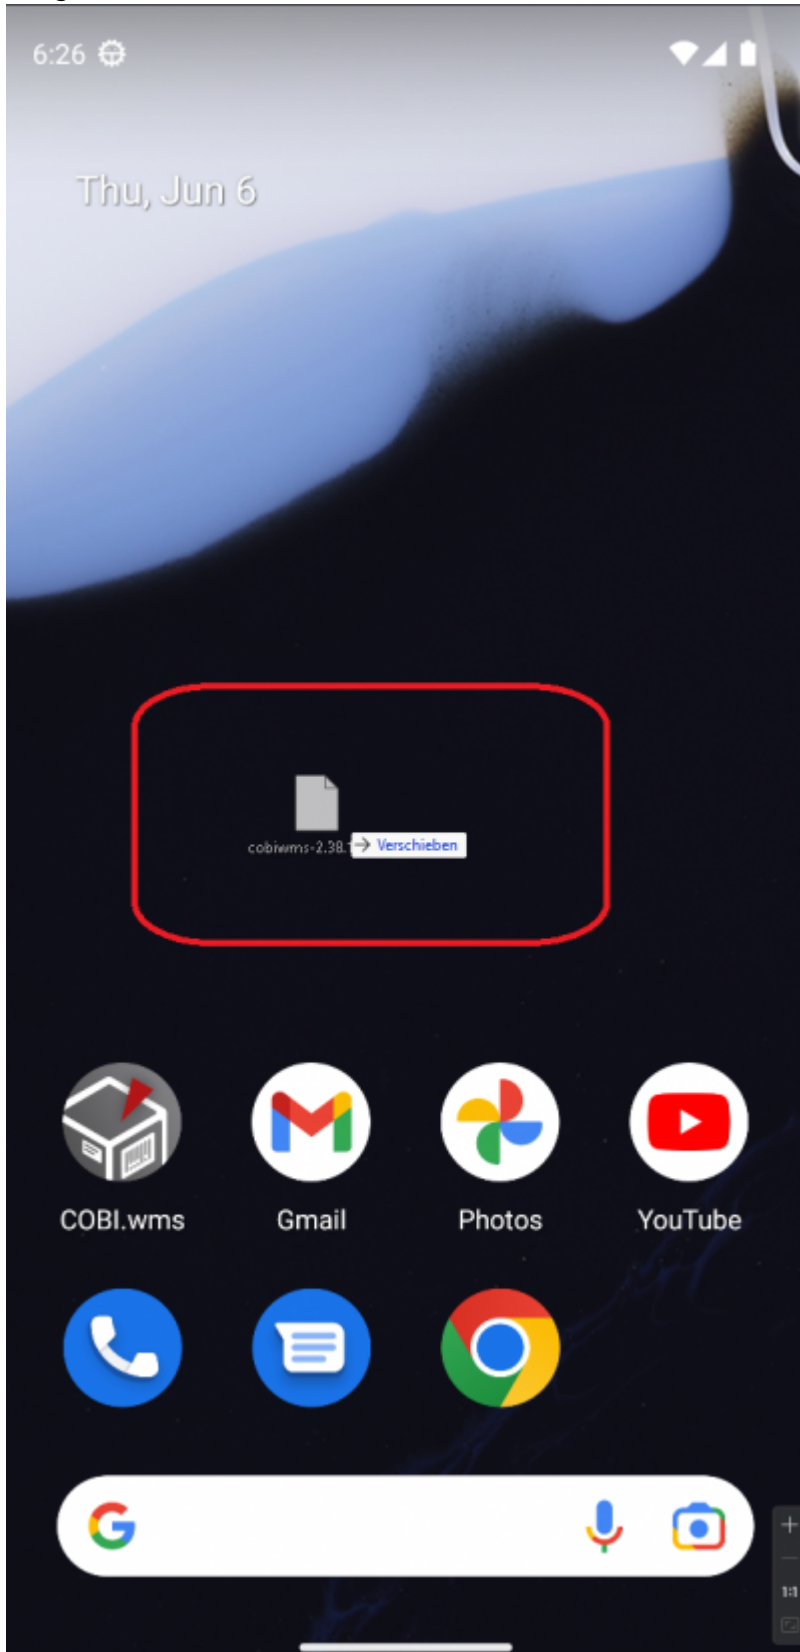

Step 9 First Time

Note that the first start may take a little longer.

Step 10 APK install

Drag the COBI.wms APK file into the virtual machine to automatically install the app.

Step 11 Configure

Configure COBI.wms with the desired database configuration (On-Premise or Cloud). The diagram shows the On-Premise version.
