

Feature List

This page contains a detailed list of all features supported by COBI.wms. If you need a feature that is not listed here, feel free to contact COBISOFT Support to file a feature request.

Platform support

- SAP Business One 9.1 or higher
- On-premises, private cloud, public cloud
- MS SQL Server and SAP HANA
- All devices with a reasonably recent Android version

Language support

Fully supported:

- English
- German
- Spanish
- Turkish

Partially supported:

- Finnish

General features

Barcode scanning

- Scanning via scanner hardware (see [Recommended Devices](#))
- Scanning via Bluetooth devices (see [Barcode scanning via Bluetooth](#))
- Scanning via camera of smartphone/tablet (not recommended)
- Support for GS1 barcodes (see [GS1 Barcodes](#))
- Scan mode where each scan of an item increases quantity by 1

Printing

- Printing wares labels directly from the app (see [Label Templates](#))
- Print via the standard print services of the Android system
- Print by connecting to a network-capable and ZPL-compatible label printer
- Trigger Coresuite Remote Print by Print Def and Layout ID (see [Print Settings](#))

Misc.

- Multi-tenancy (define several SAP Business One company databases to connect to)
- Optionally allow negative stock quantities
- Make the expiry date field mandatory for added batch numbers

Modules

Plus Booking

In SAP Business One: Inventory → Inventory Transactions → Goods Receipt

- Scan barcode to select item
- Select item from list
- Live search in item list

- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down

- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned

- Specify batch numbers

- Manually fill in batch number
- Fill in batch number details (Attribute 1, Attribute 2, Notes)

- Specify serial numbers
- Scan barcode to fill in serial number
- Manually fill in serial number
- Fill in serial number details (Manufacturer Serial, Lot Number, Notes)

- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list

- Change booking date
- Fill in *Ref. 2* field
- Fill in *Remarks* field

- Add photo attachments

Minus Booking

In SAP Business One: Inventory → Inventory Transactions → Goods Issue

- Scan barcode to select item
- Select item from list
- Live search in item list

- Early warning if specified quantity exceeds available
- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list
- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list
- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list
- Change booking date
- Fill in *Ref. 2* field
- Fill in *Remarks* field
- Add photo attachments

Relocation

In SAP Business One: Inventory → Inventory Transactions → Inventory Transfer

- Scan barcode to select item
- Select item from list
- Live search in item list
- Early warning if specified quantity exceeds available
- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list
- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list

- Specify bin locations (from and to)
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list

- Change booking date
- Fill in *Remarks* field

- Add photo attachments

Receipt

In SAP Business One: Purchasing - A/P → Goods Receipt PO

- Select purchase order as base document
- Scan barcode to select purchase order by number
- Select purchase order from list
- Live search in purchase order list

- See ordered quantities in purchase order
- Partial quantity and over-quantity allowed

- Create goods receipt without a purchase order
- Select supplier from list
- Live search in supplier list
- Automatic suggestion of matching purchase order

- Scan barcode to select item
- Select item from list
- Live search in item list

- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down

- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned

- Specify batch numbers
- Scan barcode to fill in batch number
- Manually fill in batch number
- Fill in batch number details (Attribute 1, Attribute 2, Notes)

- Specify serial numbers
- Scan barcode to fill in serial number
- Manually fill in serial number
- Fill in serial number details (Manufacturer Serial, Lot Number, Notes)

- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list

- Change booking date
- Fill in *Vendor Ref. No.* field

- Fill in *Remarks* field
- Freight costs of base document automatically copied
- Add photo attachments
- Save on device and continue later
- Changes saved automatically offline to prevent loss of work

Delivery

In SAP Business One: Sales - A/R → Delivery

- Select sales order as base document
- Scan barcode to select sales order by number
- Select sales order from list
- Live search in sales order list

- See ordered quantities in sales order
- Partial quantity and over-quantity allowed

- Create delivery without a sales order
- Select customer from list
- Live search in customer list
- Automatic suggestion of matching sales order

- Scan barcode to select item
- Select item from list
- Live search in item list

- Early warning if specified quantity exceeds available

- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down

- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned

- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list

- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list

- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list

- Change booking date
- Change delivery date

- Copy delivery date field from sales order
- Fill in *Vendor Ref. No.* field
- Fill in *Remarks* field

- Freight costs of base document automatically copied

- Create a packing slip
- Select package type
- Specify SSCC numbers for packages
- Generate SSCC numbers for packages
- Allocate batches/serials to packages

- Add photo attachments

Picking

In SAP Business One: Inventory → Pick and Pack

- View sales orders and reserve invoices not released for picking
- View incomplete pick lists based on sales orders or reserve invoices
- View completed pick lists based on sales orders or reserve invoices

- Open a pick list to edit the picked quantities
- Changes saved automatically offline to prevent loss of work

- Display batch and serial numbers allocated in base document
- Specify batch and serial numbers that have been picked
- Scan barcode to select batch or serial number
- Select batch or serial number from list
- Live search in batch or serial number list

- Display bin locations allocated in base document
- Specify bin locations that have been picked
- Scan barcode to select bin location
- Select bin location from list
- Live search in bin location list

- Select one or more partially or fully picked lists to create a delivery
 1. All lines of selected pick lists are aggregated and then grouped by customer/address
 2. Choose customer/address for which to create a delivery, or automatically create all deliveries

Purchase Return

In SAP Business One: Purchasing - A/P → Goods Return

- Select goods return request as base document
- Scan barcode to select return request by number
- Select return request from list
- Live search in return request list

- See quantities to be returned in return request

- Partial quantity and over-quantity allowed
- Create goods return without a return request
- Select supplier from list
- Live search in supplier list
- Automatic suggestion of matching return request
- Scan barcode to select item
- Select item from list
- Live search in item list
- Early warning if specified quantity exceeds available
- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list
- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list
- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list
- Change booking date
- Change delivery date (“due date” in SAP Business One)
- Fill in *Vendor Ref. No.* field
- Fill in *Remarks* field
- Freight costs of base document automatically copied
- Add photo attachments

Sales Return

In SAP Business One: Sales - A/R → Return

- Select return request as base document
- Scan barcode to select return request by number
- Select return request from list
- Live search in return request list
- See quantities that will be returned in return request
- Partial quantity and over-quantity allowed

- Create return without a return request
- Select customer from list
- Live search in customer list
- Automatic suggestion of matching return request

- Scan barcode to select item
- Select item from list
- Live search in item list

- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down

- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned

- Specify batch numbers
- Scan barcode to fill in batch number
- Manually fill in batch number
- Fill in batch number details (Attribute 1, Attribute 2, Notes)

- Specify serial numbers
- Scan barcode to fill in serial number
- Manually fill in serial number
- Fill in serial number details (Manufacturer Serial, Lot Number, Notes)

- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list

- Change booking date
- Change delivery date (“due date” in SAP Business One)
- Fill in *Vendor Ref. No.* field
- Fill in *Remarks* field

- Freight costs of base document automatically copied

- Add photo attachments

Issue for Production

In SAP Business One: Production → Issue for Production

- Select production order as base document
- Scan barcode to select production order by number
- Select production order from list
- Live search in production order list

- See quantities to be issued in production order
- Partial quantity and over-quantity allowed

- Scan barcode to select item
- Select item from list
- Live search in item list

- Early warning if specified quantity exceeds available
- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list
- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list
- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list
- Change booking date
- Fill in *Ref. 2* field
- Fill in *Remarks* field
- Add photo attachments

Receipt from Production

In SAP Business One: Production → Receipt from Production

- Select production order as base document
- Scan barcode to select production order by number
- Select production order from list
- Live search in production order list
- See quantities to be received from production order
- Partial quantity and over-quantity allowed
- Scan barcode to select item
- Select item from list
- Live search in item list
- Add discarded (rejected) quantities
- Add returned (unused) components
- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
- Specify batch numbers

- Scan barcode to fill in batch number
- Manually fill in batch number
- Fill in batch number details (Attribute 1, Attribute 2, Notes)

- Specify serial numbers
- Scan barcode to fill in serial number
- Manually fill in serial number
- Fill in serial number details (Manufacturer Serial, Lot Number, Notes)

- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list

- Change booking date
- Fill in *Ref. 2* field
- Fill in *Remarks* field

- Option to close production order

- Add photo attachments

Wares List

- Select warehouse to see wares list for
- See *On Hand*, *Committed*, *Ordered*, and *Available* quantities of items
- Select item with batches to see *On Hand*, *Committed*, and *Available* quantities of batches
- Select item with serials to see serials on hand and whether they are committed
- Select item to see its quantities per bin location
- Select batch number to see its quantities per bin location
- See bin location of serial numbers

Purchase Order

In SAP Business One: Purchasing A/P → Purchase Order

- Create a new purchase order
- Select supplier from list
- Live search in supplier list

- Scan barcode to select item
- Select item from list
- Live search in item list

- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down

- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned

- Change booking date
- Fill in *Remarks* field

- Add photo attachments

Transfer Request

In SAP Business One: Inventory → Inventory Transactions → Inventory Transfer Request

- Create a new transfer request
- Scan barcode to select item
- Select item from list
- Live search in item list
- Select correct UoM based on scanned barcode
- Choose unit of measurement from drop-down
- Select from and to warehouses from drop-down
- Change booking date
- Fill in *Remarks* field
- Add photo attachments

Inventory Counting

In SAP Business One: Inventory → Inventory Transactions → Inventory Counting Transactions → Inventory Counting

- Select inventory counting list
- See and edit quantities in inventory counting list
- Changes saved automatically offline to prevent loss of work
- Scan barcode to select item
- Select item from list
- Live search in item list
- Specify batch numbers
- Scan barcode to fill in batch number
- Manually fill in batch number
- Fill in batch number details (Attribute 1, Attribute 2, Notes)
- Specify serial numbers
- Scan barcode to fill in serial number
- Manually fill in serial number
- Fill in serial number details (Manufacturer Serial, Lot Number, Notes)
- Lines with bin locations supported
- Add new lines to counting list
- Delete lines of counting list
- Add photo attachments
