

# Feature List

This page contains a detailed list of all features supported by COBI.wms. If you need a feature that is not listed here, feel free to contact COBISOFT Support to file a feature request.

## Platform support

Server-side:

- SAP Business One 10.0 or higher
- MS SQL Server 2012+ or SAP HANA 2.0+
- On-premises, private cloud, public cloud

Minimum specs of the Android device:

- Android 8
- Screen: WVGA (800×480)
- Memory: 256 MB
- Storage: 1 GB

## Language support

Fully supported:

- English
- German
- Spanish
- French
- Turkish
- Polish

Partially supported:

- Finnish
- Suomi

## General features

### Barcode scanning

#### Methods of scanning

- Scanning via scanner hardware (see [Recommended Devices](#))
- Scanning via Bluetooth devices (not recommended, see [Barcode scanning via Bluetooth](#))

- Scanning via camera of smartphone/tablet (not recommended)

## Types of supported barcodes

- All physical formats (1D and 2D) supported by your hardware of choice
- Support for GS1 barcodes (see [GS1 Barcodes](#))
- Support for weight-embedded EAN and UPC barcodes

## Ways to scan an item

- Using an item's item code as a barcode
- Using an item's supplier catalog number as a barcode
- Using values in the barcodes table of an item's master data

## Other data that can be scanned

- Scan a warehouse code to display its stock
- Scan a bin location code or barcode to display its stock
- Scan a GS1 barcode to auto-fill various fields (see [GS1 Barcodes](#))

## Misc. barcode scanning features

- Scan mode where each scan of an item increases quantity by 1

## Printing

### Label printing

- Printing wares labels directly from the app (see [Label Templates](#)) via either:
  - Standard print services of the Android system (connect a printer in Android settings)
  - Connecting to a **ZPL-compatible** label printer via TCP/IP (printer must have Ethernet or WiFi)

### Document printing

- Trigger Coresuite Remote Print by Print Def and Layout ID (see [Print Settings](#))

## Other general features

- Multi-tenancy (define several SAP Business One company databases to connect to)
- Optionally allow negative stock quantities
- Optionally allow negative quantities in lines of booked documents
- Make the expiry date field mandatory for added batch numbers
- Warnings on expired or locked batch numbers

- Display the image of an item
- Display the attachments of an item

## Modules

### Plus Booking

*In SAP Business One: Inventory → Inventory Transactions → Goods Receipt*

- Scan barcode to select item
- Select item from list
- Live search in item list
- Scan bin location to list items in it
  
- Automatically select unit of measurement based on scanned barcode
- Manually choose unit of measurement from drop-down list
  
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
  
- Specify batch numbers
- Scan barcode to fill in batch number
- Manually fill in batch number
- Fill in batch number details (Attribute 1, Attribute 2, Notes)
  
- Specify serial numbers
- Scan barcode to fill in serial number
- Manually fill in serial number
- Fill in serial number details (Manufacturer Serial, Lot Number, Notes)
  
- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list
  
- Change booking date
- Fill in *Ref. 2* field
- Fill in *Remarks* field
  
- Add photo attachments

### Minus Booking

*In SAP Business One: Inventory → Inventory Transactions → Goods Issue*

- Scan barcode to select item
- Select item from list
- Live search in item list
- Scan bin location to list items in it
  
- Early warning if specified quantity exceeds available

- Automatically select unit of measurement based on scanned barcode
- Manually choose unit of measurement from drop-down list
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list
- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list
- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list
- Change booking date
- Fill in *Ref. 2* field
- Fill in *Remarks* field
- Add photo attachments

## Inventory Transfer

*In SAP Business One: Inventory → Inventory Transactions → Inventory Transfer*

- Select inventory transfer request as base document
- Scan barcode to select inventory transfer request by number
- Select inventory transfer request from list
- Live search in inventory transfer request list
- Only show requests for the warehouse the device is assigned to
- See requested quantities in inventory transfer request
- Partial quantity and over-quantity allowed
- Create inventory transfer without a request
- Scan barcode to select item
- Select item from list
- Live search in item list
- Scan bin location to list items in it
- Early warning if specified quantity exceeds available
- Automatically select unit of measurement based on scanned barcode
- Manually choose unit of measurement from drop-down list
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned

- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list
  
- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list
  
- Specify bin locations (from and to)
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list
  
- Change booking date
- Fill in *Remarks* field
  
- Add photo attachments

## Purchase Receipt

*In SAP Business One: Purchasing - A/P → Goods Receipt PO*

- Select purchase order as base document
- Scan barcode to select purchase order by number
- Select purchase order from list
- Live search in purchase order list
- Multi-select orders to create joint receipt
- Only show orders for the warehouse the device is assigned to
  
- See ordered quantities in purchase order
- Partial quantity and over-quantity allowed
  
- See text lines of purchase order
- Automatically copy text lines from purchase order to receipt
  
- Create goods receipt without a purchase order
- Select supplier from list
- Live search in supplier list
- Automatic suggestion of matching purchase order
  
- Scan barcode to select item
- Select item from list
- Live search in item list
- Scan bin location to list items in it
  
- Automatically select unit of measurement based on scanned barcode
- Manually choose unit of measurement from drop-down list
  
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
  
- Specify batch numbers

- Scan barcode to fill in batch number
- Manually fill in batch number
- Fill in batch number details (Attribute 1, Attribute 2, Notes)
  
- Specify serial numbers
- Scan barcode to fill in serial number
- Manually fill in serial number
- Fill in serial number details (Manufacturer Serial, Lot Number, Notes)
  
- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list
  
- Change booking date
- Fill in *Vendor Ref. No.* field
- Fill in *Remarks* field
  
- Freight costs of base document automatically copied
  
- Add photo attachments
  
- Save on device and continue later
- Changes saved automatically offline to prevent loss of work

## Sales Delivery

### *In SAP Business One: Sales - A/R → Delivery*

- Select sales order or reserve invoice as base document
- Scan barcode to select sales order or reserve invoice by number
- Select sales order or reserve invoice from list
- Live search in sales order and reserve invoice list
- Multi-select orders/invoices to create joint delivery
- Only show orders for the warehouse the device is assigned to
  
- See ordered quantities in base document
- Partial quantity and over-quantity allowed
  
- See text lines of base document
- Automatically copy text lines of base document to delivery
  
- Create delivery without a base document
- Select customer from list
- Live search in customer list
  
- Scan barcode to select item
- Select item from list
- Live search in item list
- Scan bin location to list items in it
  
- Early warning if specified quantity exceeds available
  
- Automatically select unit of measurement based on scanned barcode
- Manually choose unit of measurement from drop-down list

- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list
- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list
- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list
- Change booking date
- Change delivery date
- Copy delivery date field from sales order
- Fill in *Vendor Ref. No.* field
- Fill in *Remarks* field
- Freight costs of base document automatically copied
- Create a packing slip
- Select package type
- Specify SSCC numbers for packages (saved in UDF)
- Auto-generate SSCC numbers for packages (saved in UDF)
- Allocate batches/serials to packages (saved in UDT)
- Add photo attachments

## Picking

*In SAP Business One: Inventory → Pick and Pack*

- View sales orders and reserve invoices not released for picking
- View incomplete pick lists based on sales orders, reserve invoices, and inventory transfer requests
- View completed pick lists based on sales orders, reserve invoices, and inventory transfer requests
- Open a pick list to edit the picked quantities
- Changes saved automatically offline to prevent loss of work
- Display batch and serial numbers allocated in base document
- Specify batch and serial numbers that have been picked
- Scan barcode to select batch or serial number
- Select batch or serial number from list
- Live search in batch or serial number list
- Display bin locations allocated in base document

- Specify bin locations that have been picked
- Scan barcode to select bin location
- Select bin location from list
- Live search in bin location list
  
- Select one or more partially or fully picked lists to create a delivery or inventory transfer
  1. All lines of selected pick lists are aggregated and then grouped by customer/address
  2. Choose customer/address for which to create a delivery, or automatically create all deliveries

## Sales order

*In SAP Business One: Sales - A/R → Sales Order \* Create new sales order \* Select customer from list \* Live search in customer list \* Scan barcode to select item \* Select item from list \* Live search in item list \* View on-hand and available quantities during item selection \* Automatically select unit of measurement based on barcode \* Manually choose unit of measurement from drop-down list \* Select warehouse from drop-down \* Automatic selection of warehouse to which device is assigned \* Change booking date \* Specify delivery date \* Fill in Remarks field \* Add photo attachments ===== Purchase Return ===== In SAP Business One: Purchasing - A/P → Goods Return \* Select goods return request as base document \* Scan barcode to select return request by number \* Select return request from list \* Live search in return request list \* Multi-select return requests to create joint return \* Only show requests for the warehouse the device is assigned to \* See quantities to be returned in return request \* Partial quantity allowed \* Create goods return without a return request \* Select supplier from list \* Live search in supplier list \* Scan barcode to select item \* Select item from list \* Live search in item list \* Scan bin location to list items in it \* Early warning if specified quantity exceeds available \* Automatically select unit of measurement based on scanned barcode \* Manually choose unit of measurement from drop-down list \* Select warehouse from drop-down \* Automatic selection of warehouse to which device is assigned \* Specify batch numbers \* Scan barcode to select batch number \* Select batch number from list \* Live search in batch number list \* Specify serial numbers \* Scan barcode to select serial number \* Select serial number from list \* Live search in serial number list \* Specify bin locations \* Scan barcode to select bin location \* Choose bin location from list \* Live search in bin location list \* Change booking date \* Change delivery date (“due date” in SAP Business One) \* Fill in Vendor Ref. No. field \* Fill in Remarks field \* Freight costs of base document automatically copied \* Add photo attachments ===== Sales Return ===== In SAP Business One: Sales - A/R → Return \* Select return request as base document \* Scan barcode to select return request by number \* Select return request from list \* Live search in return request list \* Multi-select return requests to create joint return \* Only show requests for the warehouse the device is assigned to \* See quantities that will be returned in return request \* Partial quantity allowed \* Create return without a return request \* Select customer from list \* Live search in customer list \* Scan barcode to select item \* Select item from list \* Live search in item list \* Scan bin location to list items in it \* Automatically select unit of measurement based on scanned barcode \* Manually choose unit of measurement from drop-down list \* Select warehouse from drop-down \* Automatic selection of warehouse to which device is assigned \* Specify batch numbers \* Scan barcode to fill in batch number \* Manually fill in batch number \* Fill in batch number details (Attribute 1, Attribute 2, Notes) \* Specify serial numbers \* Scan barcode to fill in serial number \* Manually fill in serial number \* Fill in serial number details (Manufacturer Serial, Lot Number, Notes) \* Specify bin locations \* Scan barcode to select bin location \* Choose bin location from list \* Live search in bin location list \* Change booking date \* Change delivery date (“due date” in SAP Business One) \* Fill in Vendor Ref. No. field \* Fill in Remarks field \* Freight costs of base document automatically copied \* Add photo attachments ===== Issue for Production ===== In SAP Business One: Production → Issue for Production \* Standard and*

*Disassembly production orders supported \* Select production order as base document \* Scan barcode to select production order by number \* Select production order from list \* Live search in production order list \* See quantities to be issued in production order \* Partial quantity and over-quantity allowed \* Scan barcode to select item \* Select item from list \* Live search in item list \* Scan bin location to list items in it \* Early warning if specified quantity exceeds available \* Automatically select unit of measurement based on scanned barcode \* Manually choose unit of measurement from drop-down list \* Select warehouse from drop-down \* Automatic selection of warehouse to which device is assigned \* Specify batch numbers \* Scan barcode to select batch number \* Select batch number from list \* Live search in batch number list \* Specify serial numbers \* Scan barcode to select serial number \* Select serial number from list \* Live search in serial number list \* Specify bin locations \* Scan barcode to select bin location \* Choose bin location from list \* Live search in bin location list \* Change booking date \* Fill in Ref. 2 field \* Fill in Remarks field \* Add photo attachments ===== Receipt from Production ===== In SAP Business One: Production → Receipt from Production \* Standard and Disassembly production orders supported \* By-products in production order supported \* Select production order as base document \* Scan barcode to select production order by number \* Select production order from list \* Live search in production order list \* See quantities to be received from production order \* Partial quantity and over-quantity allowed \* Scan barcode to select item \* Select item from list \* Live search in item list \* Scan bin location to list items in it \* Add discarded (rejected) quantities \* Add returned (unused) components \* Automatically select unit of measurement based on scanned barcode \* Manually choose unit of measurement from drop-down list \* Select warehouse from drop-down \* Automatic selection of warehouse to which device is assigned \* Specify batch numbers \* Scan barcode to fill in batch number \* Manually fill in batch number \* Fill in batch number details (Attribute 1, Attribute 2, Notes) \* Specify serial numbers \* Scan barcode to fill in serial number \* Manually fill in serial number \* Fill in serial number details (Manufacturer Serial, Lot Number, Notes) \* Specify bin locations \* Scan barcode to select bin location \* Choose bin location from list \* Live search in bin location list \* Change booking date \* Fill in Ref. 2 field \* Fill in Remarks field \* Option to close production order \* Add photo attachments ===== Wares List ===== \* Select warehouse to see wares list for \* See On Hand, Committed, Ordered, and Available quantities of items \* Select item with batches to see On Hand, Committed, and Available quantities of batches \* Select item with serials to see serials on hand and whether they are committed \* Select item to see its quantities per bin location \* Select batch number to see its quantities per bin location \* See bin location of serial numbers ===== Purchase Request ===== In SAP Business One: Purchasing A/P → Purchase Request \* Create a new purchase request \* Scan barcode to select item \* Select item from list \* Live search in item list \* Scan bin location to list items in it \* Automatically select unit of measurement based on scanned barcode \* Manually choose unit of measurement from drop-down list \* Select warehouse from drop-down \* Automatic selection of warehouse to which device is assigned \* Change booking date \* Specify required date \* Fill in Remarks field \* Add photo attachments ===== Purchase Order ===== In SAP Business One: Purchasing A/P → Purchase Order \* Create a new purchase order \* Select supplier from list \* Live search in supplier list \* Scan barcode to select item \* Select item from list \* Live search in item list \* Scan bin location to list items in it \* Automatically select unit of measurement based on scanned barcode \* Manually choose unit of measurement from drop-down list \* Select from and to warehouses from drop-down \* Change booking date \* Fill in Remarks field \* Add photo attachments ===== Inventory Counting ===== In SAP Business One: Inventory → Inventory Transactions → Inventory Counting Transactions → Inventory Counting \* Select inventory counting list \* See and edit quantities in inventory counting list \* Changes saved automatically offline to prevent loss of work \* Scan*

*barcode to select item \* Select item from list \* Live search in item list \* Specify batch numbers \* Scan barcode to fill in batch number \* Manually fill in batch number \* Fill in batch number details (Attribute 1, Attribute 2, Notes) \* Specify serial numbers \* Scan barcode to fill in serial number \* Manually fill in serial number \* Fill in serial number details (Manufacturer Serial, Lot Number, Notes) \* Lines with bin locations supported \* Add new lines to counting list \* Delete lines of counting list \* Add photo attachments*
