

Feature List

This page contains a detailed list of all features supported by COBI.wms. If you need a feature that is not listed here, feel free to contact COBISOFT Support to file a feature request.

Platform support

Server-side:

- SAP Business One 10.0 or higher
- MS SQL Server 2012+ or SAP HANA 2.0+
- On-premises, private cloud, public cloud

Minimum specs of the Android device:

- Android 8
- Screen: WVGA (800×480)
- Memory: 256 MB
- Storage: 1 GB

Language support

Fully supported:

- English
- German
- Spanish
- French
- Turkish
- Polish

Partially supported:

- Finnish
- Suomi

General features

Barcode scanning

Methods of scanning

- Scanning via scanner hardware (see [Recommended Devices](#))
- Scanning via Bluetooth devices (not recommended, see [Barcode scanning via Bluetooth](#))

- Scanning via camera of smartphone/tablet (not recommended)

Types of supported barcodes

- All physical formats (1D and 2D) supported by your hardware of choice
- Support for GS1 barcodes (see [GS1 Barcodes](#))
- Support for weight-embedded EAN and UPC barcodes

Ways to scan an item

- Using an item's item code as a barcode
- Using an item's supplier catalog number as a barcode
- Using values in the barcodes table of an item's master data

Other data that can be scanned

- Scan a warehouse code to display its stock
- Scan a bin location code or barcode to display its stock
- Scan a GS1 barcode to auto-fill various fields (see [GS1 Barcodes](#))

Misc. barcode scanning features

- Scan mode where each scan of an item increases quantity by 1

Printing

Label printing

- Printing wares labels directly from the app (see [Label Templates](#)) via either:
 - Standard print services of the Android system (connect a printer in Android settings)
 - Connecting to a **ZPL-compatible** label printer via TCP/IP (printer must have Ethernet or WiFi)

Document printing

- Trigger Coresuite Remote Print by Print Def and Layout ID (see [Print Settings](#))

Other general features

- Multi-tenancy (define several SAP Business One company databases to connect to)
- Optionally allow negative stock quantities
- Optionally allow negative quantities in lines of booked documents
- Make the expiry date field mandatory for added batch numbers
- Warnings on expired or locked batch numbers

- Display the image of an item
- Display the attachments of an item

Modules

Plus Booking

In SAP Business One: Inventory → Inventory Transactions → Goods Receipt

- Scan barcode to select item
- Select item from list
- Live search in item list
- Scan bin location to list items in it

- Automatically select unit of measurement based on scanned barcode
- Manually choose unit of measurement from drop-down list

- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned

- Specify batch numbers
- Scan barcode to fill in batch number
- Manually fill in batch number
- Fill in batch number details (Attribute 1, Attribute 2, Notes)

- Specify serial numbers
- Scan barcode to fill in serial number
- Manually fill in serial number
- Fill in serial number details (Manufacturer Serial, Lot Number, Notes)

- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list

- Change booking date
- Fill in *Ref. 2* field
- Fill in *Remarks* field

- Add photo attachments

Minus Booking

In SAP Business One: Inventory → Inventory Transactions → Goods Issue

- Scan barcode to select item
- Select item from list
- Live search in item list
- Scan bin location to list items in it

- Early warning if specified quantity exceeds available

- Automatically select unit of measurement based on scanned barcode
- Manually choose unit of measurement from drop-down list
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list
- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list
- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list
- Change booking date
- Fill in *Ref. 2* field
- Fill in *Remarks* field
- Add photo attachments

Inventory Transfer

In SAP Business One: Inventory → Inventory Transactions → Inventory Transfer

- Select inventory transfer request as base document
- Scan barcode to select inventory transfer request by number
- Select inventory transfer request from list
- Live search in inventory transfer request list
- Only show requests for the warehouse the device is assigned to
- See requested quantities in inventory transfer request
- Partial quantity and over-quantity allowed
- Create inventory transfer without a request
- Scan barcode to select item
- Select item from list
- Live search in item list
- Scan bin location to list items in it
- Early warning if specified quantity exceeds available
- Automatically select unit of measurement based on scanned barcode
- Manually choose unit of measurement from drop-down list
- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned

- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list

- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list

- Specify bin locations (from and to)
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list

- Change booking date
- Fill in *Remarks* field

- Add photo attachments

Purchase Receipt

In SAP Business One: Purchasing - A/P → Goods Receipt PO

- Select purchase order as base document
- Scan barcode to select purchase order by number
- Select purchase order from list
- Live search in purchase order list
- Multi-select orders to create joint receipt
- Only show orders for the warehouse the device is assigned to

- See ordered quantities in purchase order
- Partial quantity and over-quantity allowed

- See text lines of purchase order
- Automatically copy text lines from purchase order to receipt

- Create goods receipt without a purchase order
- Select supplier from list
- Live search in supplier list
- Automatic suggestion of matching purchase order

- Scan barcode to select item
- Select item from list
- Live search in item list
- Scan bin location to list items in it

- Automatically select unit of measurement based on scanned barcode
- Manually choose unit of measurement from drop-down list

- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned

- Specify batch numbers

- Scan barcode to fill in batch number
- Manually fill in batch number
- Fill in batch number details (Attribute 1, Attribute 2, Notes)

- Specify serial numbers
- Scan barcode to fill in serial number
- Manually fill in serial number
- Fill in serial number details (Manufacturer Serial, Lot Number, Notes)

- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list

- Change booking date
- Fill in *Vendor Ref. No.* field
- Fill in *Remarks* field

- Freight costs of base document automatically copied

- Add photo attachments

- Save on device and continue later
- Changes saved automatically offline to prevent loss of work

Sales Delivery

In SAP Business One: Sales - A/R → Delivery

- Select sales order or reserve invoice as base document
- Scan barcode to select sales order or reserve invoice by number
- Select sales order or reserve invoice from list
- Live search in sales order and reserve invoice list
- Multi-select orders/invoices to create joint delivery
- Only show orders for the warehouse the device is assigned to

- See ordered quantities in base document
- Partial quantity and over-quantity allowed

- See text lines of base document
- Automatically copy text lines of base document to delivery

- Create delivery without a base document
- Select customer from list
- Live search in customer list

- Scan barcode to select item
- Select item from list
- Live search in item list
- Scan bin location to list items in it

- Early warning if specified quantity exceeds available

- Automatically select unit of measurement based on scanned barcode
- Manually choose unit of measurement from drop-down list

- Select warehouse from drop-down
- Automatic selection of warehouse to which device is assigned
- Specify batch numbers
- Scan barcode to select batch number
- Select batch number from list
- Live search in batch number list
- Specify serial numbers
- Scan barcode to select serial number
- Select serial number from list
- Live search in serial number list
- Specify bin locations
- Scan barcode to select bin location
- Choose bin location from list
- Live search in bin location list
- Change booking date
- Change delivery date
- Copy delivery date field from sales order
- Fill in *Vendor Ref. No.* field
- Fill in *Remarks* field
- Freight costs of base document automatically copied
- Create a packing slip
- Select package type
- Specify SSCC numbers for packages (saved in UDF)
- Auto-generate SSCC numbers for packages (saved in UDF)
- Allocate batches/serials to packages (saved in UDT)
- Add photo attachments

Picking

In SAP Business One: Inventory → Pick and Pack

- View sales orders and reserve invoices not released for picking
- View incomplete pick lists based on sales orders, reserve invoices, and inventory transfer requests
- View completed pick lists based on sales orders, reserve invoices, and inventory transfer requests
- Open a pick list to edit the picked quantities
- Changes saved automatically offline to prevent loss of work
- Display batch and serial numbers allocated in base document
- Specify batch and serial numbers that have been picked
- Scan barcode to select batch or serial number
- Select batch or serial number from list
- Live search in batch or serial number list
- Display bin locations allocated in base document

- Specify bin locations that have been picked
- Scan barcode to select bin location
- Select bin location from list
- Live search in bin location list
- Select one or more partially or fully picked lists to create a delivery or inventory transfer
 1. All lines of selected pick lists are aggregated and then grouped by customer/address
 2. Choose customer/address for which to create a delivery, or automatically create all deliveries

Sales order

*In SAP Business One: Sales - A/R → Sales Order * Create new sales order * Select customer from list * Live search in customer list * Scan barcode to select item * Select item from list * Live search in item list * View on-hand and available quantities during item selection * Automatically select unit of measurement based on barcode * Manually choose unit of measurement from drop-down list * Select warehouse from drop-down * Automatic selection of warehouse to which device is assigned * Change booking date * Specify delivery date * Fill in Remarks field * Add photo attachments*

*==== Purchase Return ==== In SAP Business One: Purchasing - A/P → Goods Return * Select goods return request as base document * Scan barcode to select return request by number * Select return request from list * Live search in return request list * Multi-select return requests to create joint return * Only show requests for the warehouse the device is assigned to * See quantities to be returned in return request * Partial quantity allowed * Create goods return without a return request * Select supplier from list * Live search in supplier list * Scan barcode to select item * Select item from list * Live search in item list * Scan bin location to list items in it * Early warning if specified quantity exceeds available * Automatically select unit of measurement based on scanned barcode * Manually choose unit of measurement from drop-down list * Select warehouse from drop-down * Automatic selection of warehouse to which device is assigned * Specify batch numbers * Scan barcode to select batch number * Select batch number from list * Live search in batch number list * Specify serial numbers * Scan barcode to select serial number * Select serial number from list * Live search in serial number list * Specify bin locations * Scan barcode to select bin location * Choose bin location from list * Live search in bin location list * Change booking date * Change delivery date (“due date” in SAP Business One) * Fill in Vendor Ref. No. field * Fill in Remarks field * Freight costs of base document automatically copied * Add photo attachments*

*==== Sales Return ==== In SAP Business One: Sales - A/R → Return * Select return request as base document * Scan barcode to select return request by number * Select return request from list * Live search in return request list * Multi-select return requests to create joint return * Only show requests for the warehouse the device is assigned to * See quantities that will be returned in return request * Partial quantity allowed * Create return without a return request * Select customer from list * Live search in customer list * Scan barcode to select item * Select item from list * Live search in item list * Scan bin location to list items in it * Automatically select unit of measurement based on scanned barcode * Manually choose unit of measurement from drop-down list * Select warehouse from drop-down * Automatic selection of warehouse to which device is assigned * Specify batch numbers * Scan barcode to fill in batch number * Manually fill in batch number * Fill in batch number details (Attribute 1, Attribute 2, Notes) * Specify serial numbers * Scan barcode to fill in serial number * Manually fill in serial number * Fill in serial number details (Manufacturer Serial, Lot Number, Notes) * Specify bin locations * Scan barcode to select bin location * Choose bin location from list * Live search in bin location list * Change booking date * Change delivery date (“due date” in SAP Business One) * Fill in Vendor Ref. No. field * Fill in Remarks field * Freight costs of base document automatically copied * Add photo attachments*

*==== Issue for Production ==== In SAP Business One: Production → Issue for Production * Standard and*

*Disassembly production orders supported * Select production order as base document * Scan barcode to select production order by number * Select production order from list * Live search in production order list * See quantities to be issued in production order * Partial quantity and over-quantity allowed * Scan barcode to select item * Select item from list * Live search in item list * Scan bin location to list items in it * Early warning if specified quantity exceeds available * Automatically select unit of measurement based on scanned barcode * Manually choose unit of measurement from drop-down list * Select warehouse from drop-down * Automatic selection of warehouse to which device is assigned * Specify batch numbers * Scan barcode to select batch number * Select batch number from list * Live search in batch number list * Specify serial numbers * Scan barcode to select serial number * Select serial number from list * Live search in serial number list * Specify bin locations * Scan barcode to select bin location * Choose bin location from list * Live search in bin location list * Change booking date * Fill in Ref. 2 field * Fill in Remarks field * Add photo attachments ===== Receipt from Production ===== In SAP Business One: Production → Receipt from Production * Standard and Disassembly production orders supported * By-products in production order supported * Select production order as base document * Scan barcode to select production order by number * Select production order from list * Live search in production order list * See quantities to be received from production order * Partial quantity and over-quantity allowed * Scan barcode to select item * Select item from list * Live search in item list * Scan bin location to list items in it * Add discarded (rejected) quantities * Add returned (unused) components * Automatically select unit of measurement based on scanned barcode * Manually choose unit of measurement from drop-down list * Select warehouse from drop-down * Automatic selection of warehouse to which device is assigned * Specify batch numbers * Scan barcode to fill in batch number * Manually fill in batch number * Fill in batch number details (Attribute 1, Attribute 2, Notes) * Specify serial numbers * Scan barcode to fill in serial number * Manually fill in serial number * Fill in serial number details (Manufacturer Serial, Lot Number, Notes) * Specify bin locations * Scan barcode to select bin location * Choose bin location from list * Live search in bin location list * Change booking date * Fill in Ref. 2 field * Fill in Remarks field * Option to close production order * Add photo attachments ===== Wares List ===== * Select warehouse to see wares list for * See On Hand, Committed, Ordered, and Available quantities of items * Select item with batches to see On Hand, Committed, and Available quantities of batches * Select item with serials to see serials on hand and whether they are committed * Select item to see its quantities per bin location * Select batch number to see its quantities per bin location * See bin location of serial numbers ===== Purchase Request ===== In SAP Business One: Purchasing A/P → Purchase Request * Create a new purchase request * Scan barcode to select item * Select item from list * Live search in item list * Scan bin location to list items in it * Automatically select unit of measurement based on scanned barcode * Manually choose unit of measurement from drop-down list * Select warehouse from drop-down * Automatic selection of warehouse to which device is assigned * Change booking date * Specify required date * Fill in Remarks field * Add photo attachments ===== Purchase Order ===== In SAP Business One: Purchasing A/P → Purchase Order * Create a new purchase order * Select supplier from list * Live search in supplier list * Scan barcode to select item * Select item from list * Live search in item list * Scan bin location to list items in it * Automatically select unit of measurement based on scanned barcode * Manually choose unit of measurement from drop-down list * Select from and to warehouses from drop-down * Change booking date * Fill in Remarks field * Add photo attachments ===== Inventory Counting ===== In SAP Business One: Inventory → Inventory Transactions → Inventory Counting Transactions → Inventory Counting * Select inventory counting list * See and edit quantities in inventory counting list * Changes saved automatically offline to prevent loss of work * Scan*

*barcode to select item * Select item from list * Live search in item list * Specify batch numbers * Scan barcode to fill in batch number * Manually fill in batch number * Fill in batch number details (Attribute 1, Attribute 2, Notes) * Specify serial numbers * Scan barcode to fill in serial number * Manually fill in serial number * Fill in serial number details (Manufacturer Serial, Lot Number, Notes) * Lines with bin locations supported * Add new lines to counting list * Delete lines of counting list * Add photo attachments*
