Print Helper

The COBI.wms Print Helper receives commands from the Android app over the network and triggers a print event on the MS Windows machine it runs on. Currently, it only supports doing so by generating a Coresuite Remote Print XML file.

Download: cobiwms-print-helper.zip

Install

1. Extract the contents of `cobiwms-print-helper.zip` to `C:\cobiwms-print-service\`.
2. Run the following command in `cmd.exe` or PowerShell:
   `C:\Windows\Microsoft.NET\Framework64\v4.0.30319\InstallUtil.exe C:\cobiwms-print-service\cobiwms-print-service.exe`
3. Create `C:\cobiwms-print-service\config.json`.
4. You can now start/stop the service from the MS Windows `Services` application.

Example config file:

```
{
  "ListenPort": 9110
  ,"PrintDirectory": "C:\\CoresuiteRemotePrint\\Productive"
}
```

Update

1. Stop the service.
2. Extract the contents of the new ZIP file into `C:\cobiwms-print-service\`.
3. Start the service.

Uninstall

1. Stop the service.
2. Run the following command in `cmd.exe` or PowerShell:
   `C:\Windows\Microsoft.NET\Framework64\v4.0.30319\InstallUtil.exe /u C:\cobiwms-print-service\cobiwms-print-service.exe`
3. Delete the folder `C:\cobiwms-print-service\`.
