For more information please check [here](#)

Fixed Bugs

- Fixed several app crashes, including:
 - Renaming sample labels in the label printing module
 - Fixed an app crash in Picking related to the “Pick Unit” dialog.
 - Scanning QR codes in print settings
 - Fixed an app crash when deleting empty packing lists.
- Fixed multiple Service Layer errors, such as:
 - Error during transfer (property 'U_PickUnitCode') despite the option being disabled
 - Error -43 when adding items to a stock transfer request
- Fixed incorrect or confusing UI behavior:
 - Wrong color markings (green/red) during stock transfers
 - If the inventory count list is assigned approval levels, the list will not be displayed even in the approved status.
 - Fixed inconsistent behavior in Goods Receipt when using different date formats (MM/DD/YYYY vs. DD/MM/YYYY) for batch items with a future production date.
 - “Pick and Pack” production orders always highlighted in blue
 - Reference fields allowing too many characters (conflict with SAP)
 - Incorrect display of search lists and icons
 - Missing warning when leaving modules (attachment lost)
- Fixed logic issues with expiration dates:
 - Contradicting options between “Expiration date mandatory” and “Validate expiration date”
 - Incorrect handling for non-batch managed items
 - Checkbox logic now consistent
- Fixed issues in customer orders:
 - Missing delivery address blocked document creation without explanation
 - Comment lines were overwritten in SAP
 - Incorrect wording (“Production” shown incorrectly)
- Fixed general usability issues:
 - Overlapping error messages in Picking
 - “Barcode not found” message could not be stacked
 - DEMO database connection error
- Fixed various spelling mistakes, typos and incorrect translations across the UI.
