

# COBI.time (Web) - Quick Guide

This quick guide describes how to use COBI.time in a web browser (not on a terminal). Available features include time corrections, vacation requests, history/monthly overview, and activity/project time booking.

## 1. Login & Orientation (Web Version)

### Login

- Open COBI.time in your browser: <https://cobitime-xxx.xxx.net/Login>
- Depending on your configuration, log in using:
  - Username + password
  - PIN via the PIN button

After logging in, the dashboard will load.

## 2. Dashboard & Key Areas

On the dashboard you will find:

- Menu bar
- Digital time clock
- Notifications
- Monthly overview

Via the info icon in the digital time clock you can access personal information, history, and requests. Note: Some features depend on user permissions (e.g., booking activities).

The screenshot shows the COBI TIME dashboard for user Kora Adelheid. The dashboard includes a profile card with a 'COMING' button and a 'LOCATION' button. The 'Presence List' section shows a grid of employee cards, including Bill Armstrong, Julie Bowers, Fred Buyer, James Chan, Cathrin Fröhlich, Bernhard Heinrich, George Keeng, Robert Leitner, Conrad Lübke, Michael Maier, and Vicky Schmidt. The 'Notifications' section lists three notifications from Robert Leitner. The 'Monthly History' section shows a table with the following data:

Monthly History	
Avg. working hours	02:43
Avg. break time	00:00
Balance	-632:49

The screenshot shows the user profile for Bill Armstrong. The profile includes a photo, the name 'Bill Armstrong', and a status of 'Absent'. Below this, the 'Today's working hours' are listed as:

- 00:02 hours Worked
- 00:00 hours Break
- 01:00 hours Pausetime left

The 'Balance' is shown as -2.342:09 hours. At the bottom, there are three red buttons: 'Time Report', 'Time correction request', and 'Absence request'. Below these buttons is a progress bar with the following data:

Category	Value
Taken	0 Days
Unconfirmed	0 Unconfirmed
Available	54 Days

### 3. Create a Time Correction Request

#### Procedure

1. Open the info icon in the digital time clock
2. Select Time correction request
3. In the calendar, choose the affected day
  - o green dot = bookings exist → can be corrected

- no marking = a complete entry can be added afterwards
- 4. Click the time and change it to the correct time
- 5. Optional: use + to add whole days or activities afterwards
- 6. Enter a reason in the comment field (mandatory)
- 7. Submit the request → it will be forwarded to your manager/team lead

Practical tip: Useful if you forgot to book activities/projects (see section 6).

**Time Correction Request**

1. Date: 27.02.2026

2. Calendar: February 2026

3. from: 11:20

4. to: 11:20

Duration: 00:00

Activity: Working Time

5. Comment:

6. SUBMIT

Optional: +

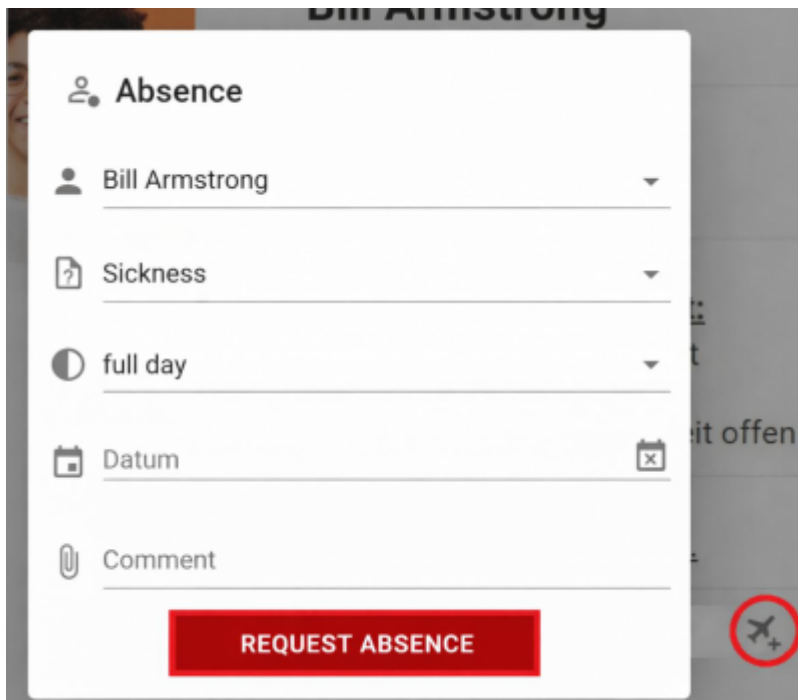

Comment missing! 0 / 400

## 4. Submit a Vacation Request

Vacation is submitted as an absence request (absence reason = Vacation).

Procedure

1. Open the menu item Absence request
2. Select the absence reason Vacation
3. Choose half-day/full-day and set the date
4. Optional: add a comment and/or attachment
5. For multiple days: select a start and end date
6. Click Request absence → the request will be sent to your manager for approval

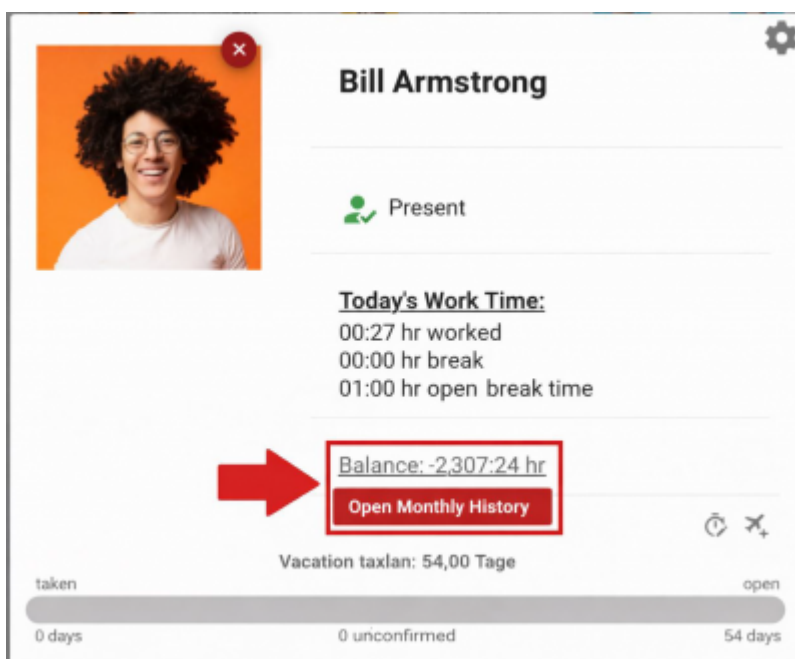

## 5. View History

There is a monthly overview as well as daily details (click on a day).

Via Balance:

1. Open the info icon
2. Select Balance → the monthly overview appears
3. Use the arrows to switch between months
4. Select a day → daily overview with individual bookings

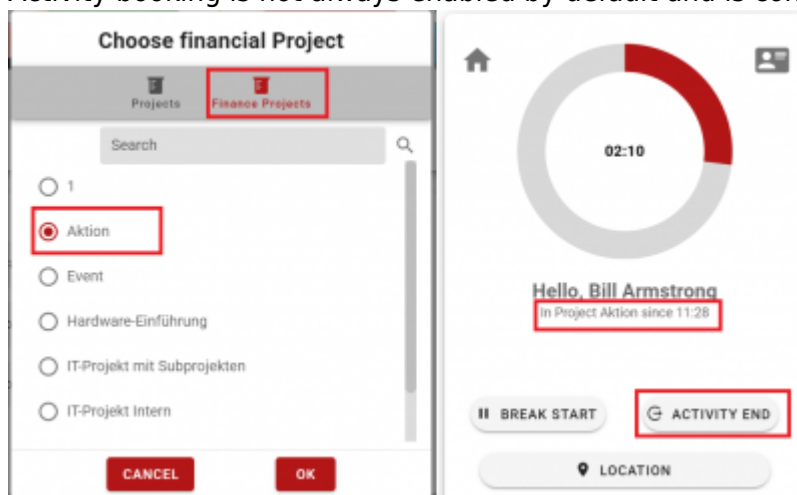

## 6. Book Activities (Projects/Service Calls/Financial Projects/Cost Centers)

Activities can be booked during ongoing working time.

### Procedure

1. Start working time (Kommen or Dienstreise; e.g., Clock in / Business trip)
2. Select + Activity
3. Choose an activity (e.g., project, service call, financial project, cost center)
4. The active booking appears in the digital time clock
5. End the activity via Project end
6. Breaks can still be booked as usual
7. Activities are transferred from SAP Business One (they are not created in COBI.time)
8. Use the search to find the right activity more quickly

Note: If no activities are displayed, permissions are usually missing or no objects are assigned. Activity booking is not always enabled by default and is controlled via settings/permissions.
